Editor and Reviewer comments:

Reviewer #1:

1. This article has some rather interesting information, and the topic is quite important; however, there seem to be some basic points that point to the lack of a questionnaire, which makes its conclusions a bit questionable.
2. The use of English is so incomprehensible, that as a first step, journal editors are needed to find out what needs to be rethought.
3. Literature review refers to experiences and studies of interest elsewhere, but not related to research and, conclusions.
4. The focus of this paper only applies to Indonesia. What about the use of other countries and questionnaires?
5. It takes a lot of information about the object of research, not about the content of the research.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Arsyad Sobby Kesuma, et. al.
UIN Raden Intan Lampung

Thank you for your efforts to make improvements to your article.

Based on the Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
2. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
3. When study design comes into play, there are serious questions about the system.
4. It might be publishable if the Author could work with a robust English language editor or colleague to clean up both language and argument.
5. A side note is that it's not clear what title references the article.

Articles that have been revised and please send them back via this email.
