To: Nanang Nanang Supriadi &lt;nanangsupriadi@radenintan.ac.id&gt;

Nanang Nanang Supriadi:

We have completed the preliminary review for your manuscript entitled "Implementation of a realistic mathematics learning approach (PMR) and analytical thinking: The impact on students' understanding of mathematical concepts in Indonesia". It is suitable for our journal's scope.

We sent your paper to the referees to evaluate, and our decision is "Revision Required". And here are some of the comments that you have to fix:

- A total of the references must contain at least 25 references. With a composition of 50% of Sinta 2 accredited journals, 30% of Scopus or Web of Science indexed journals and the remaining 20%. All the references are coming from the latest issues (at least the last 5 years).
- Journal references for the variable of your research must come from reputable International Journals (Scopus indexed or Web of Science indexed).
- Must use MENDELEY reference management with the American Psychological Association (APA) style.
- The manuscript that has been submitted in Al-Jabar: Jurnal Pendidikan Matematika may not be submitted in other journals before the decision is given (accepted/rejected). If this happens, the author will be blacklisted for 3 years (6 editions).
- This script has a problem with the English language used. Use a professional translator for language translation.
- The title, purpose and research method are out of sync.
- See the results of the plagiarism test, if your plagiarism results reach or more than 20% please fix it to reach less than 20%.
- Note that we will prioritize manuscripts from responsive authors and authors who follow the editor's advice.

Along with this email, we sent you the result of the plagiarism test and the first peer review result.

Thank you for your interest in our journal  
Best regards,

Fredi Ganda Putra  
Editor-in-Chief, Al-Jabar: Jurnal Pendidikan Matematika
