ABSTRACT

This research was aimed to find out the improvement of eighth grade students' speaking ability in giving opinion using ESA (Engaged, Study, Activate) method at SMP N 1 Talang Padang in the Academic year 2022/2023. This particular research was categorized as classroom action research. The actions were implemented in three cycles based on the class schedule. This research involved the 31 students of class VIII A of SMP Negeri 1 Talang Padang in the academic year of 2022/2023 and the researcher as the research collaborator. The data of the research were in the forms of qualitative and quantitative data.

Meanwhile, the result of the research showed that there was an improvement in students' speaking ability. The students' improvement was proved by their speaking test result which improved from test to test. In the pre-test, there were only 25,8 % of students or 8 students who could pass the Minimum Mastery Criterion (KKM), and the mean score was 53,54. In the post-test 1 in Cycle 1, there were 29 % of students or 9 students who passed the KKM, and the mean score was 62,45. Therefore, there was a little improvement from the pre-test to the post-test 1. Then, in the post-test 2 in Cycle 2, there were 48,38 % of students or 15 students who passed the KKM, and the mean score was 73,16. there was a still little improvement from the post-test 1 to the post-test 2. Finally, in the post-test 3, it showed that the improvement was quite large that there were 80.64 % of students or 25 students who could pass the KKM, and the mean score was 76,64. Thus, this indicated that it had met the criterion of success that 75% of students must get the score above the KKM. Meanwhile, the result of the students' questionnaire also showed that their responses in learning speaking was good. The students were interested, motivated, and more self-confident in speaking English, after being introduced to and practiced using this ESA method.

CHAPTER I

INTRODUCTION

A. Title Confirmation

Confirmation Title is important to clarify the words associated with the title of this research. This research is entitled "Improving Eighth Grade Students' Speaking Ability in Giving Opinion by Using ESA (Engage, Study, Activate) method at SMP N 1 Talang Padang in the Academic year 2022/2023" The explanation is as follows:

1. ESA (Engaged, Study, Activate)

ESA is a learning method developed by Jeremy Harmer. He stated that in the learning process, ESA is like a computer system where everything is interconnected. The application of this method to English language learning is carried out through three stages, namely the Engage stage, the Study stage, and the Activate stage.²

2. Speaking Ability

Speaking is one of the skills that must be mastered and really must be able to be practiced in the field with other people as the interlocutor. In the education system, learning English using Speaking material will be taught by the teacher and usually the teacher uses discussion or dialogue techniques as the first step in teaching. In this speaking skill, one must really have mastered the pronunciation well. Pronunciation is a rule in pronouncing words in English or the way someone pronounces a word.³

²Jeremy Harmer, *How to Teach English. an Introduction to The Practice Of English Language Teaching*, (London: Longman, 1998), 15.

³Jeremy Harmer. *The Practice in English Teaching*. (New York: Longman, 2001), 271.

3. Giving Opinion

Giving opinions is the solution to express our idea based on the question or discussion to other people like judgment or belief that comes from an assumption point of view. In addition, there is a critical difference thing between opinions and facts. Facts are real events that happen, while opinions are opinions about something and are not necessarily true. So that by understanding these facts and opinions, we can understand the aims and objectives contained in a discourse.⁴

Based on the description of the terms above, it can be understood that what is meant by the title of this research is to find out the improvement of eighth grade students' speaking ability in giving and responding opinion by using ESA method at SMP N 1 Talang Padang.

B. Background of the Problem

Speaking is one of four skills that has important role than any skills due to its frequency us for kind of social connection in life. Speaking also becomes an indicator to measure person's communication. Speaking is important for communicate in social life and improving experiences in life. Without speaking, people will have a problem in communication and will get in almost total isolation from any ability in understanding English language.

The successfulness of English learners is seen from their ability in using English to communicate effectively.⁵ According to Byrne, speaking is oral communication in a two way process between the speaker and listener(s) which involves both productive skill of speaking and the receptive skill of

understanding (listening with understanding).⁶ Many definitions about speaking have been proposed by language experts. Speaking is an interaction skill. It involves capability to use language to satisfy specific request⁷. It means, speaking is important since people use it to express specific request and content in life. Rebecca in Efrizal stated that speaking is the first way for children acquire language. It involves daily communication of most people with language activities. This process is the prime motor of language change.⁸

Burns and Joyc stated that speaking is an interactive process of constructing meaning that involves producing, receiving, and processing information. So, it can be said that speaking is an important language skill which involves both productive and receptive skill that enables people (the students) to communicate with others effectively.⁹ For example, when the teacher asks students for their opinions about the material that has been explained by the teacher before. Also, the teacher gives some questions to the students about the material being discussed. These activities will be easier to do by speaking. Speaking has a role as one of the goal of language lesson and others. To make a student can communicate effectively, the speaker needs to master communicative competence.

Speaking is one of the four language skills (reading, writing, listening and speaking). It is the means through which learners can communicate with others to achieve certain goals or to express their opinions, intentions, hopes and viewpoints. In addition, people who know a language are referred to as 'speakers' of that

language. Furthermore, in almost any setting, speaking is the most frequently used language skill. As Rivers argues, speaking is used twice as much as reading and writing in our communication.¹⁰

Based on Bygates's opinion that people must be confident to speak English to do some transactions such as asking and answering 2 questions. It will be an indicator either they are good in communication or not, because it influences their friendship. So, speaking can be used in mixed situation based on place and condition, to value the way of how people communicate each other, to do several transaction to get the ideas from the speakers to the listeners with appropriate way based on their place and situation.

Therefore, speaking is the use of language to communicate with other. It means that this activity involves two or more people in whom the participants are both hearers and speakers having to react to whatever they hear and make their contribution a high speed, so each participant has intention or a set of intention that he wants. So, the English teacher should active the students speaking ability by providing communicative language activities and interesting media in the classroom and then giving them the opportunities to practice their speaking skill as much as possible.

The results of research conducted by Juita octaviani on 32 students SMPN 1 Sipahutar, shows that the students' distrust to speak English in public is high category.¹¹ Whereas, Research that conducted by Gunadi, Fitri novia shows that The problems of this research that students are reluctant to express their opinions due to a lack of vocabulary, lack of skills in the issue that students would address, or embarrassment if they are not accustomed to

expressing their thoughts, and this classroom has become a passive class.¹²

In order to obtain the phenomenon of confidence in speaking, the researchers conducted initial interviews with 31 students of class VIII.1 at SMPN 1 Talang Padang. From the results of the interview, it was found that most of students have difficulty in learning speaking. The students can not deliver their ideas and thoughts orally, when the teacher asked their opinion about something. They did not know how or what to say in English. It caused they become speechless. The factors might be caused lack of vocabulary and self confidence.

Therefore, there are three reasons why speaking skill is difficult for the students. First, the cause is the students are lack of motivations in learning English. second, caused by the scheduled time is limited in teaching speaking skill, and another reason is the students mostly are not confident to share their idea and afraid of making mistakes in speaking.¹³ Whereas, teaching English as a foreign language requires the use of effective learning methods, techniques, language games, or activities that promote the speaking ability.

meanwhile, the students' speaking abilities were assessed through test on 9th August 2022. Based on the result of the pre-test, the data was known that the mean of the pre-test was 53,54. Then, the class percentage of the pre-test was 25,8 %. It means that there were only 8 students who passed the Minimum Mastery Criterion or KKM, meanwhile the other 23 students were still got the scores below the criterion. Therefore, it means that the result of students' in speaking ability of eighth grade especially 8.1 was poor.¹⁴

Then, the result of the pre-test, the researcher calculated the mean, maximum Score, minimum score of the pre-test score as follows :

Table 1.1 The result of pre-test

Content	Score of pre-test
Mean	53,54
Max. score	80
Min. score	36

For overcome this situation there is an effective method that teaching speaking ability can be done through some various activities that can promote speaking ability. We can choose one of the language teaching activities that are suitable with the level of our students. As known as later by using ESA (Engaged, Study, and Activate) Method. The ESA method is an acronym for Engage, Study, and Activate which are three important elements in the language learning process in particular. Harmer in English, Engage Study and Activate is one of the learning methods presented in the classroom to help students learn more effectively. related to the topic being discussed and the topic is able to involve students in the learning process.¹⁵

The selection of this method as a solution is based on the consideration that this method provides opportunities for students to develop and use the knowledge of the language they have and master because in this method students are required to speak actively and the teacher as a teacher functions as an activator.

¹⁵Jeremy Harmer, *How to Teach English. an Introduction to The Practice Of English Language Teaching*, (London: Longman, 1998), 15.

Engage can be interpreted as a condition where The teacher or the teacher arouses or arouses the attention of students so that students' emotions enter the learning situation. This element is elements that function to make students' emotions happy and challenged so that they do not feel bored but instead students feel they get a better learning situation.

Meanwhile, study can be interpreted as a situation where students are asked to focus on information or language and how that information or language is formed. In other words, students are involved in processing information from teaching materials, both information contained in a text and linguistic elements and structures contained in the text. that. So the main focus of this element is text and linguistic structure.

The last element is activate which describes exercises and learning activities designed in such a way that the student uses the language as freely and as communicatively as possible. In this element, learning activities do not focus on linguistic elements but invite students to use the language whether the language is acceptable in certain circumstances and situations or on certain topics.¹⁶

Considering the explanation above, the researcher proposes a research thesis entitle "Improving eighth grade students' speaking ability in giving opinion by using ESA (Engage, Study, Activate) method at SMP N 1 Talang Padang in the Academic year 2022/2023"

C. Identification of the Research Area and Its Focus

Based on the background and the phenomena above, the researcher finds out that the focus that are identified as follows:

1. The students are lack of motivations in learning English
2. The students have limited time in learning English

¹⁶ "Ibid "

3. The students in Junior high school still have difficulties in learning speaking
4. The students mostly are not confident to share their opinion and afraid of making mistakes in speaking.

D. Limitation of the Problem

Based on this background and problems, the problems studied in this study are as follows:

1. The research give motivated only in learning speaking
2. The research used is only limited to Giving Opinion
3. The research only tested for improving students' speaking ability
4. The research used by ESA (Engaged, Study, Activate) method

E. Formulation of the Problem

Based on the identification above, finally the problem is formulated as follows:

How is ESA Method improve the eighth grade students' speaking ability in giving opinion at SMP N 1 Talang Padang in the Academic year 2022/2023 ?

F. Objectives of the Research

Based on the formulation of the problem stated above, this research is aimed to find out the improvement of eighth grade students' speaking ability in giving opinion using ESA (Engaged, Study, Activate) at SMP N 1 Talang Padang in the Academic year 2022/2023.

G. Significance of the Research

1. For Theoretical Contribution

This study is using ESA Method to find out the improvement of eighth grade students' speaking ability in giving opinion at SMP N 1 Talang Padang in the Academic

year 2022/2023. This method hopefully can accomplish and solve the problem come up in students teaching speaking ability.

2. For Practical Contribution

a. For the Students

This research is aimed to improve motivation and interest in learning speaking through giving and responding opinion expression so that they can enhance their speaking ability and find the interesting teaching and learning process. It can be the new experience for them in learning English so that their speaking achievement can be better.

b. For the Teacher

By using ESA Method, the teachers can teaching speaking well and make learning process can be interest.

c. For the next researcher

This Research hopefully can be used by next researchers as reference materials who are interested Improving students' speaking ability.

H. Relevant Research

Based on the theoretical study that has been done, there are severals previous researches are relevant to the research that will be carried out by the researcher, they are:

1. The results of research conducted by Ilinawati, Sudarsono, Regina¹⁷ entitled:

ESA (Engage, Study, Activate) to improve teaching speaking on job interview

The problem of this research that the teacher did not teach pronunciation well. The teacher only taught some unfamiliar words without hearing any problems from the students. The

students still looked afraid of making mistakes on pronunciation, still doubt on mentioning some words. This study is about improving the teaching of speaking by applying ESA strategy to the students of SMK Nusantara Indah Sintang in Academic Year 2015/2016. It was a classroom action research (CAR) and involved the Year – 11 students of SMK Nusantara Indah. The sample of this research is the students of SMK Nusantara Indah Sintang in Academic Year 2015/2016, They consisted of 20 males and 4 females. this research, applied the observation and measurement techniques to collect the data, and data analysis from this research using by the improvement of the students' performance from the first cycle to the second cycle, as well as their score in each test and achievement in each item. The results were supported with the data collected through observation to students' and teachers' performances and the field notes, there were some important improvements of students and teacher. The result of this research showed that ESA strategy succeeded improving the teaching speaking. The mean score was 71,67 in the first cycle and 80,28 in the second cycle. The improvement of the teaching learning process was based on the improvement of teaching learning behaviour in the classroom.

Activate Method at the second year students of SMP Negeri 26 Makassar. This research used Classroom Action Research that comprises of two cycles. The research population is the second year students of SMP Negeri 26 Makassar, and the sample of this research comprises of 25 students. The researcher obtained the data by using a speaking test and observation sheet. The results of this research show that there is an improvement in students' vocabulary between the cycle I and Cycle II. The mean scores of students in the diagnostic test are 4.7 became 6.21 in cycle I, and after doing a revision in the cycle II the mean score in cycle II is 7.45 then the activeness of students also improve from first meeting 53 % became 92% in the last meeting and achieved the minimal criteria, 65. The research findings indicate that the use of Engage, Study and Activate method can enrich the students' vocabulary mastery and improve the students' activeness in speaking.

Improving Student's Speaking Skill Through ESA Straight for Word Model at The Year 11th Students Of MA Muhammadiyah 1 Malang

The common problem of the Students in speaking are werelow in motivation, got difficulties to deliver what they want to say, and they were afraid of making an error. The researcher conducted his research in that school because he found the same problems atthe year 11th Students of MA MUHAMMADIAH 1 MALANG which consists of 21 students. ESA straight for word method were used to solve the problem. The researcher used Classroom Action Research as the research design. The research procedure consisted of some main steps: planning the action, implementation, observation

Considering the findings above, by using ESA straight for word method had reached the expected outcome and the criteria of success in one cycle. Based on the result of the analysis, it was concluded that the ESA straight for word model technique improved the students' speaking skill. The implementation of ESA straight for word model had successfully improved students' speaking skill of the year 11th students at MA Muhammadiyah 1 Malang.

The objective of this research was to investigate whether or not where ESA can Improves students' speaking in ability at Second Grade Students' of SMP Negeri 1 Sipahutar. This research was conducted by using Classroom Action Research (CAR). The subject of this research was the Second Grade students of SMP Negeri 1 Sipahutar which consist of 32 students. This research was conducted in two cycles which each consists' of planning, action, observation, and reflection. The data were gathered through quantitative and qualitative data. The result of this research showed that there was increasing of students in speaking ability. The mean of pre-test was 58.12. The mean of

The percentage of students who got students point >75 also grew up. In the pre-test, the students who got point >75 up were 5 students (15.62%). In the post-test Cycle I students who got >75 up were 9 students (28.12%). And in the post-test Cycle II the students who got point >75 up were 31 students (96.87%). In the other words, the students' ability in speaking improves.

From the explanation of the five previous studies above, there are several differences that distinguish this research from previous studies, including:

1. This research was conducted in first semester at SMP N 1 Talang Padang
2. This research focuses on Giving opinion
3. This study uses the ESA (Engaged, Study, Activate) method.
4. The subject of this research is 31 students

Then the similarity of this research with previous research is as follows:

1. Use the ESA method (engaged, study, activate) in overcoming the problem.
2. Use picture and video as media in learning speaking.
3. Use classroom action research.

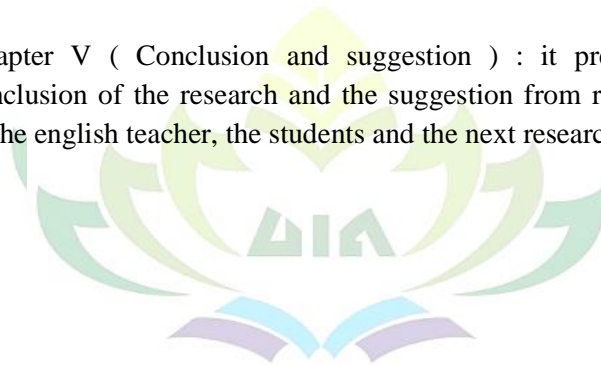

I. Systematics of the research

As the orientation of writing this thesis, the researcher extended each chapter as follows :

1. Chapter I (Introduction) : it presents title confirmation, background of the problem, identification of the research area and its focus, limitation of the problem, formulation of the problem, objective of the research, significance of the research, relevant research, and the systematics of the research.
2. Chapter II (Review of literature) : it provides of some explanation based on the title and some literatures based on the research. It includes the general concept of speaking, general

concept of ESA method, general concept of giving opinion, action models, and the Hypothesis.

3. Chapter III (Research method) : it covers research design, subjects and setting of the research, and procedures of the research include, preliminary observation, planning, implementing, observing, and reflecting.
4. Chapter IV (Findings and discussions) : it present findings before CAR, the implemintation CAR, findings after CAR, and the data interpretation.
5. Chapter V (Conclusion and suggestion) : it present the conclusion of the research and the suggestion from researcher to the english teacher, the students and the next researcher

CHAPTER II LITERATURE REVIEW

A. Speaking

Speaking is one of the four language skills (reading, writing, listening and speaking). It means through which learners can communicate with others to achieve certain goals or to express their opinions, intentions, hopes and viewpoints. In addition, people who know a language are referred to as “speakers” of that language. Those are some definition, the aims, types, aspects of speaking according the expert, as follows :

1. Definition of Speaking

There are many definitions of speaking that have been proposed by some experts. Speaking is an interactive process of constructing meaning that involves producing and receiving and processing information. In addition, jeremy states that the benchmark of successful acquisition of language is almost always the demonstration of an ability to accomplish pragmatic goals through an interactive discourse with other language speakers.²²

Speaking is a skill in producing oral language. It is not only an utterance but also a tool of communication.²³ Speaking is the active production skill and use oral production. It is capability of someone to communicate orally with others. The one who has skilled in speaking can be identified from his/her ability in using the oral language fluently, clearly and attractively. As

Rivers argues, speaking is used twice as much as reading and writing in our communication.²⁴

Speaking has usually been compared to writing, both being considered "productive skills", as opposed to the "receptive skills" of reading and listening. Speaking also is closely related to listening as two interrelated ways of accomplishing communication. Every speaker is simultaneously a listener and every listener is at least potentially a speaker.

Developing speaking skills is of vital importance in EFL/ESL programs. Nunan and Burkart & Sheppard argue that success in learning a language is measured in terms of the ability to carry out a conversation in the (target) language.²⁵ Therefore, speaking is probably a priority for most learners of English.²⁶

Its form and meaning are dependent on the context in which it occurs, including the participants themselves, their collective experiences, the physical environment, and the purposes for speaking. Speaking is a productive language skill. It means that speaking is a person's skills to produce sounds that exists at the meaning and be understood by other people, so that able to create of good communication.

Therefore, speaking is the use of language to communicate with other. It means that this activity involves two or more people in whom the participants are both hearers and speakers having to react to whatever they hear and make their contribution a high speed, so each participant has intention or a set of intention that he wants. So, the English teacher should active the students speaking ability by providing

communicative language activities and interesting media in the classroom and then giving them the opportunities to practice their speaking skill as much as possible.

2. The Aims of Speaking

The main purpose of speaking is to communicate. Speaking is an important tool to communicate or to deliver mind things about what the speaker will be said with their society. That is why, speaking is very important. Basically, there are three important aims of speaking they are:

1) To inform

To inform means that the speaker wants to inform and share ideas, information, process feeling or opinion to the hearer and give knowledge as well in particular purpose. In this case, the speaker just want to inform about a fact.

2) To entertain

To entertain means that the speaker wants to make the hearer feels happier with the materials which are selected primarily based on their entertainment value. For example when the teacher told about story to the students, the parents told the funny story to their children. By doing it, speaking will be more interesting to be heard by the listener

3) To persuade

To persuade means that the speaker tries to confirm the hearer to do something in certain activity. The teacher has to make a good teaching to the students by giving them example in delivering material. From the example, the students can be understand the mindset the lesson and be active to join the lesson. The activities need the actions to make the listener interested to perform the actions in which the speaker wants.

4) To discuss

To discuss means that the speaker wants to discuss something because the purpose of speaking is to make

some decisions and planning. Discussion activity is believed to get more attention from the students because they have to solve a problem from the task which is given by the teacher. From the statements before, it can be concluded that through speaking, somebody can inform their feeling and knows somebody's feeling from ask him in their communication and make some decisions.²⁷

3. Types of Speaking

Brown states all effective tests, appropriate assessment tasks Speaking begins with the specification of objective or criteria. Those objectives may be classified in term of several types of speaking performance. Brown has stated four types speaking, those are :²⁸

1) Imitative

At the one end of continuum of types of speaking performance is the ability of simply parrot back (imitate) or phrase or possibly a sentence.

2) Intensive

A type of speaking frequently employing assessment context is the production of short stretches of oral language designed to demonstrate competence in narrow band of grammatical, phrase, lexical or phonological relationship (such as prosodic elements into ration, stress, rhythm, or juncture)

3) Responsive

Responsive assessment tasks included interaction and test comprehension but at the somewhat limited level of very short conversations, standard greetings and a small talk, simple request and comments and the like.

²⁸H. Douglas Brown, *Language Assessment: Principles and Classroom Practices*. (New York: Pearson Education Inc, 2003), 141.

4) Interactive

It is the type of speaking frequently employed in assessment contexts is the production of short stretches of oral language designed to grammatical, phrasal, lexical or phonological relationship (such as prosodic element-intonation, stress, rhythm, juncture).

5) Extensive

The difference between responsive speaking and interactive speaking is in the length of the conversation and the number of participants involved in a conversation where interactive speaking involves more participants who enliven the conversation and the conversation is more complex. For example, transactional conversations (conducted with the aim of obtaining information such as those in the examples of conversations A and B) and interpersonal (conducted with the aim of socializing such as greetings).

This research is going to focus in responsive speaking because responsive speaking deals with short replies to teacher's or other students' questions or comments.

4. Aspects of Speaking

In speaking, there are some aspects that must be fulfilled by the learners. It can be used as a measurement whether our speech is good or not. Those are fluency, comprehension, grammar, vocabulary, and pronunciation. The description is according to Brown as follows :

1) Fluency

It refers to one's ability to speak smoothly and easily. Fluency is the matter of the way someone speaks the language without any trouble like thinking the word confusing the idea.

2) Comprehension

Comprehension is student competence to comprehend all of the speakers says to them.

3) Grammar

Grammar is the way to organize the words into the correct sentence. This is important that if the speaker can master grammar to organize the word so the speaker also easily to speak English well.

4) Vocabulary

Vocabulary is the basic of language. It appears in every language skill, it is very important because we can say nothing without vocabulary in or mind. Vocabulary is about choice of word which is used appropriately based on the context of speaking.

5) Pronunciation

Based on the definition, pronunciation is the important component of language. Therefore, it is necessary if the students have a good pronunciation because if they have a good pronunciation so their speaking will be understandable.²⁹

5. Speaking Ability

Speaking ability are the skills that give us the ability to communicate effectively. These skills allow the speaker, to convey his message in a passionate, thoughtful, and convincing manner. Speaking ability is one of the four languages foreign language skills (listening, speaking, reading, and writing) that must be mastered in learning language a foreign language. Harmer states that effective speakers need to be able to process language in their own heads and put it into coherent order so that it comes out in forms that are not only comprehensible, but also convey the

²⁹H. Douglas Brown, *Language Assessment: Principles and Classroom Practices*. (New York: Pearson Education Inc, 2004), 406-407.

meanings that are intended.³⁰ One of the reasons for including speaking activities in language lessons is to help students familiar with oral use of language in English conversation. Speaking is one of the four abilities in the language activities. It is important to convey in the communication. Those are the categories of core speaking:

1) Pronunciation

Pronunciation is the way in which a word or language is spoken. To pronounce words, we push air from our lungs up through our throat and vocal chords, through our mouth, past our tongue and out between our teeth and lips.

2) Speech function

Speech function is a way of someone delivers ideas in communication to make listeners understand the ideas well. Speech function itself can be divided into four kinds; statement, question, command, and offer.

3) Interaction

Interaction is a kind of action that occurs as two or more objects have an effect upon one another. The idea of a two-way effect is essential in the concept of interaction, as opposed to a one-way causal effect.

6. Teaching Speaking

Teaching is a process in which learner, teacher, curriculum and other variable are organized in a systematic and psychological way to attain some pre-determined goals. According to stated that the status EFL—when it is not used during daily interactions—is further compromised by reduced student motivation to learn the language. Living in an environment in which mastery of English is not an urgent goal likely decreases students' motivation to learn English, even if it is a

³⁰Jeremy Harmer. *The Practice in English Teaching*. (New York: Longman, 2001), 271.

mandatory school subject. When English is a foreign language that is hardly used during daily local life, where students have limited opportunity to use and practice the language, this can lead to students thinking that English is not important, especially in remote control areas. As a result, they are unlikely to make it a priority to exert energy, time and money to learn English. Learning English as a foreign language is different thing to do for the most Indonesian students, because it cannot be learnt naturally as their mother tongue. Usually learning another language means learning the dictionary, grammar and the sound of system in that language. Focusing on language form is important in foreign language learning, but developing the ability to the real communication in English is the main goals of an English language course. At the end of a course, the learners should be able to communicate effectively in English in or outside the classroom for study, works or leisure. Teaching speaking as a set of competencies just as we can instruct, present and practice specific grammar features to students, the component competencies which make up speaking a pure language skill can also be broken down and presented systematically. Some useful language-sub-skills which can be turned into practice activities are:

- 1) Avoiding repetition
- 2) Responding appropriately while listening
- 3) Turn-taking techniques
- 4) Politeness
- 5) Circumlocution (talking around unknown words using known language)
- 6) Extending ideas

7. Micro and Macro-skills of Speaking

a. These are micro and macro-skills of speaking stated by Brown as follows :

1) Micro Skills of Speaking

- a) Produce differences among English phonemes and allophonic variants.
- b) Produce chunks of language of different lengths.
- c) Produce English stress patterns, words in stressed and unstressed positions, rhythmic structure and intonation contours.
- d) Produce reduced forms of words and phrases.
- e) Use an adequate number of lexical units (words) to accomplish pragmatic purposes.
- f) Produce fluent speech at different rates of delivery.
- g) Monitor one's own oral production and use various strategic devices—pauses, fillers, self-corrections, backtracking—to enhance the clarity of the message.
- h) Use grammatical word classes (nouns, verbs, etc), systems (e.g., tense, agreement, pluralization), word order, patterns, rules and elliptical forms.
- i) Produce speech in natural constituent: in appropriate phrases, pause groups, breath groups and sentence constituents. Express a particular meaning in different grammatical forms.
- j) Teaching is a process in which learner, teacher, curriculum and other variable are organized in a systematic
- k) Use cohesive devices in spoken discourse.

- 2) Macro skills of Speaking
 - a) Appropriately accomplish communicative functions according to situations, participants and goals.
 - b) Use appropriate styles, registers, implicature, redundancies, pragmatic conventions, conversation rules, floor-keeping and-yielding, interrupting and other sociolinguistic features in face-to-face conversations.
 - c) Convey links and connections between events and communicate such relations as focal and peripheral ideas, events and feelings, new information, generalization and exemplification.
 - d) Convey facial features, kinesics, body language and other nonverbal cues along with verbal language.
 - e) Develop and use a battery of speaking strategies, such as emphasizing key words, rephrasing, providing a context for interpreting the meaning of words, appealing for help and accurately assessing how well your interlocutor is understanding you.³¹

B. ESA (Engaged, Study, Activate) Method

1. Definition of ESA Method

Engage, Study, Activate (ESA) is a method of sequencing activities in your lessons, and was first proposed by Jeremy Harmer in his book, 'How to Teach English' At first glance, ESA appears to be the same as PPP (Presentation, Practice, Production). Like PPP, there are three stages. Each stage of ESA roughly corresponds to PPP, but with ESA the stages can be moved around or used more than once. These stages can be

³¹H. Douglas Brown, *Language Assessment: Principles and Classroom Practices*. (New York: Pearson Education Inc, 2004), 142-143.

used like Lego bricks, fitting together in multiple combinations. This can keep things interesting for students as they can get bored with the same structure every lesson. Let's look at each stage in turn, and then how they can fit together.³²

a. Engage

This is the stage where you get the learners interest. If it's at the beginning of the lesson, it's also where you'll set the context. You could engage learners using things like:

- 1) Dramatic stories or anecdotes
- 2) Music
- 3) Discussions
- 4) Exciting pictures or video clips

It's also about personalisation — encouraging learners to relate the material to themselves, or making predictions about the material and lesson. The focus of this stage is building engagement.

b. Study

This is the equivalent to both the 'Practice' and 'Production' stages of a PPP lesson. Learners should look at the target language, notice how it looks or sounds, and make sure they can reproduce it accurately.

While the methods can include the kind of teacher-led activities that you might find in a PPP lesson (such as drilling or explicit grammar instruction), it can also include discovery activities. These are more like the tasks that you might find in a task-based lesson, and are more about leading students to find their own answers. The focus here is on accuracy of the target language.

c. Activate

This is the equivalent of the 'Production' stage of a PPP lesson. Learners should be able to do activities that

³²Jeremy Harmer. *How to teach English. England*: Pearson Education Limited. 2007.

promote communication, that everyone can get involved in. This could involve writing activities as well as spoken. Unlike a strict PPP class, students can use any and all language that they feel necessary to complete the activity. All of these activities would fulfil the criteria for an 'activate' stage:

- 1) Role-plays
- 2) Dialogue creation
- 3) Email exchanges
- 4) Designing an advert
- 5) Debates

2. The Procedure of the ESA Method

ESA is a learning method developed by Jeremy Harmer. He stated that in the learning process, ESA is like a computer system where everything is interconnected.³³

1. The Engaged point is carried out to provoke students to think and speak in English, as well as the first step towards learning. During the Engage phase, the teacher tries to arouse students' interest and engage their emotions. This can be done through games, the use of pictures, sound recordings, videos, stories, or funny anecdotes. The aim is to arouse interest, curiosity, and attention of students.
2. At the Study point, The point (activities) in a teaching sequence where Students are asked to focus in on language/information and how it is constructed. The range from macro to micro concentrations: Macro : studying a transcript for

³³Jeremy Harmer, *How to Teach English. an Introduction to The Practice Of English Language Teaching*, (London: Longman, 1998), 15.

spoken style. Micro : studying a specific verb tense. It includes a variety of study styles: explanations, discovery through evidence, groups, whole-class, pairs, and individual. The main focus is the construction of language.

3. In the Activate point, exercises and activities are carried out that aim to provoke students to use communicative language according to their respective abilities. At this point, students are not focused on language construction or specific language practice patterns, but use their language knowledge in carrying out tasks. Activities that can be done include storytelling, compiling sentences, role playing, answering questions, communication games, and others.

Harmer describes a variation that can be used with the ESA model called the Straight Arrow Approach with the Boomerang (EASA) variation, which is a task-based approach. In the Boomerang approach, after the Engage (E) phase, students are given a task (A) using the language they know, and then proceed to the Study(S) phase. The Study Phase was carried out based on what the teacher saw in the students' language performance. In short, the teacher will fill in the gaps in students' knowledge. To check learning, students are then reactivated (A).³⁴

Boomerang ESA: Engage > Study > Activate

³⁴ Jeremy Harmer, *The Practice of English Language Teaching*, (England: Pearson Longman, 2007), 54.

3. The Strength of the ESA Method

The most effective of ESA method is patchwork. It is unique procedure because on one procedure has many phases to make students understand and the students' achievement related well. For instance, it has some variations in giving the students activities which related their activity. Students are certainly more attentive, motivated, and helpful when they perceive the content to somehow relate their lives.

4. The Weakness of the ESA Method

The amount of teacher talking time is disproportionately high compared to the amount of students talking time, certainly in the first part of the lesson. It encourages accuracy over fluency, and this is not always the desired outcome of a course. In doing this Method, the teachers have to think of what to do in their lessons. The teachers have to decide what it is, the teacher hope their students will achieve by the end of a lesson. Three ESA elements reminds their of the need for student engagement; it prompts their to ensure that three are study events built into the plan; it ensures that in almost all lessons there are also opportunities for students to have a go at using the language they are learning.

C. Giving Opinion

1. Definition of Opinions

As a human, people need each other for the survival of their life. Without others, a human can not do anything. Especially the one activity that can not be avoided is communication. Communication is an important thing to get somebody connected, especially with family, friends, or maybe communicating with the teacher at a class or college. However, when the communication was running, people sometimes want to know how their opinions and how they will give their opinions based on their idea about what happened.

According to Mitchel, opinions are some of the oral response or answer that somebody gives in response to one stimulus condition in which some general question is raised. Thus, based on the definition above, giving opinions is the solution to express our idea based on the question or discussion to other people like judgment or belief that comes from an assumption point of view. In addition, there is a critical difference thing between opinions and facts. Facts are real events that happen, while opinions are opinions about something and are not necessarily true. So that by understanding these facts and opinions, we can understand the aims and objectives contained in a discourse. Thus, opinion is the personal opinion of a person. which is not based on facts but rather on its taste.³⁵

2. Types of Opinions

Everyone has their opinions, and the opinions maybe could similar or different from others. In addition, Iswandi stated that there are several types the opinions that can be differentiated such as :

a. Personal Opinions

Personal opinions are the opinions that come from individual opinions based on some issue that happened. For instance, in my opinion, learning a language is more difficult if you did not practice.

b. Group Opinions

Group opinion is an opinion that comes from a group of people to express social issues happened. It is opinions based on collecting opinions that gave other people. For example: Social media is capable of influencing the information of public opinions that determines the community's political attitude.

³⁵Mitchell Malcolm, *Propaganda, polls, and public opinion*. ed. (New York: Prentice hall, 1997), 67.

c. Majority Opinions

Majority opinions are the opinions related to the issue that happened, contain pros, cons, and judgment. However, majority opinions has some similarities with cultural regulation. For example, in my opinion, tourists from other countries should follow the rules that exist in Balinese people.

d. Mass Opinions

Mass opinions are negative opinions that involve physical contact if the opinions should not accept very well. However, these opinions have positive characteristics because they are given free and open to understanding common people.³⁶

3. Expressing Asking, Giving and Responding Opinions

People in certain circumstances given the issues that occur will certainly express and show their opinions. There are four ways to expressing asking, giving and responding opinions by the Ministry of Education and Culture of Republic Indonesia such as:

1) Asking opinions

The usage of this expression is flexible because utilized in formal and informal conditions. For example:

- 1) Would you give me your opinion on ...?
- 2) What are your views on ...?
- 3) Do you have any idea ...?
- 4) What is your feeling about ...?
- 5) Have you got any comments on ...?
- 6) Could you tell me your opinion about ..?
- 7) I'd like to know your views on ...?
- 8) What is your view on ...?
- 9) What do you think about ...?

³⁶Iswandi Syahputra, *Opini Publik*, ed. (Bandung: Simbiosia Rekatama Media, 2018), 21.

- 10) What is your opinion?
- 11) How about ..?
- 12) What do you think of ...?

2) Giving opinions

a. Personal point of view

The usage of this expression is flexible because utilized in formal and informal conditions. For example:

- 1) Personally, I think....
- 2) I strongly believe that...
- 3) In my humble opinions...
- 4) According to me...
- 5) In my opinions....
- 6) I would like to point out that....
- 7) May I make a comment on that?
- 8) My own view of the matter is...

b. General point of view

The usage of this expression is relative based on general people's thoughts, and they can use these words and phrases. For examples;

- 1) Generally, it is accepted...
- 2) Some people say that...
- 3) Majorly disagree with..
- 4) It is considered....
- 5) While some people believe
- 6) Feel that we should ...

3) Responding opinions

a. Agreeing with an opinions

The usage of this expression for agreeing with someone's point of view. For example :

- 1) That is a good point.
- 2) That is absolutely right.

- 3) I think so look
- 4) I agree with this opinions.
- 5) You have a point there
- 6) I see what you mean
- 7) That is one way of looking at it
- 8) Good point

D. Action Models

This research is done in order to know the influence of Engaged, study and activate method in teaching speaking. Speaking is a skill used by someone to communicate orally in daily life whether at school or outside the school. Most teachers tried to find techniques in order to make students interested in learning speaking. At least, they can speak in a simple conversation freely. In fact, the students of the eight grade of SMP Negeri 1 Talang have difficulties in speaking subject. It caused by some factors: first, they are too shy and afraid to speak in the front of the class because lack of self- confidence. Second, they are unmotivated and lack of practice. Lastly, they need an interesting method to stimulate them to speak in the class.

In order to solve the students' problem faced by students of the eight grade of SMP Negeri 1 Talang Padang, and make students more motivated, E.S.A Method may provide for helping the students to improve their oral ability. E.S.A present a real life situation and provide the most useful and interesting lesson so the students can speak freely and confidently in the front of the class and this method quite interesting and reduce students' boredom in learning English.

Based on the statement above, the researcher assumed that ESA (Engaged, study, and activate) method can be applicable to be use for teaching-learning English especially in speaking. Simply, it can be seen at the simple chart below :

E. Hypothesis

Based on Action models, the researcher formulated the hypothesis as follow : The ESA (Engaged, Study, Activate) method can improve eighth grade students' speaking ability in giving and responding opinion at SMP Negeri 1 Talang Padang in the academic year 2022/2023.

Go Left

A woman came to a wise man and asked for advice. She said that she had a terrible day. Nothing went right. She did everything wrong and her boss got angry easily.

That woman told everything that happened to her. While the wise man nodded in understanding. At the end of her story, she asked, “Why nothing is going right?”

The wise man gave her a simple answer “If nothing goes right, then go left.”

Terjemahannya :**Pergi ke kiri**

Seorang wanita mengunjungi lelaki bijak dan meminta nasehat. Wanita itu berkata kalo ia memiliki hari yang buruk, tidak ada satupun yang berjalan dengan baik. Dia melakukan kesalahan dan bosnya mudah marah.

Wanita itu menceritakan segala yang terjadi kepadanya. Sedangkan lelaki bijak tersebut mengangguk memahaminya. Di akhir ceritanya, wanita itu bertanya “Why nothing is going right?”

Lekaki bijak tersebut memberinya jawaban singkat “If nothing goes right, then go left”

Obeying Mother

One day there was a mother cooking in the kitchen. Then she called her son who was watching TV in the living room. “Budi buy me a packet of salt in Mrs. Inah’s shop!” Her mother begged. “Take this money but remember that the shop is across the street. You have to be careful. Do not cross the street before the car passes first, “her mother warned.”Alright mom” replied Budi.

Budi immediately went to the shop. After waiting for a long time, his mother was worried because Budi did not come after nearly a half an hour. Soon afterward, she left her house to see Budi. She was worried that Budi was in danger.

After arriving near the shop, she was surprised to see the Budi stood motionless on the roadside. “Why are you so long?” asked her mother.

“I cannot cross this street mom” she was wonder and asked “why does it so? The street was very quiet, right? “”That is right, I want to cross the street but there is no car which passing by” Budi replied. “How can be like that?” her mother getting surprised. “You told me that don’t cross the street before the car pass first and now I am waiting for the car

to pass first. Therefore I cannot cross this street “replied Budi. His mother could only be silent.

Artinya:

Mematuhi Perintah Ibu

Pada suatu hari seorang ibu yang sedang memasak di dapur. dia memanggil anaknya yang sedang asyik menonton TV di ruang tamu. “Budi belikan ibu sebungkus garam di warung bu inah!” pinta ibunya. “ini uangnya, ingat warung bu inah ada di seberang jalan sana. kamu harus berhati-hati. jangan menyebrang sebelum mobil lewat” ibunya memperingatkan. “baik bu” jawab budi.

Budi pun segera pergi menuju warung bu inah. Setelah lama menunggu ibunya merasa khawatir karena Budi tak kunjung datang setelah hampir setengah jam menunggu. “Lama sekali anak itu jangan-jangan dia tetabrak mobil” segera ibunya pergi menyusul si Budi karena khawatir anaknya dalam bahaya.

Setelah sampai di dekat warung bu inah, ibunya terkejut melihat budi berdiri terdiam di pinggir jalan raya. “budi kenapa kau lama sekali?” Tanya ibunya. “aku tidak bisa menyebrangi jalannan ini bu” jawab budi. Ibunya heran dan bertanya “kenapa tidak bisa? Jalanan itu sangat sepi kan?” “jalanan sangat sepi buk, aku ingin meyebrang tapi tidak ada mobil yang lewat” jawab budi. “kenapa begitu?” ibunya semakin heran. “loh bukannya ibu menyuruhku jangan menyebrang sebelum mobil lewat. Setelah aku tunggu-tunggu tidak ada mobil yang lewat. oleh karena itu aku tidak bisa menyebrang jalanan ini” jawab budi. Ibunya pun hanya bisa terdiam.

To get the result of the pre-test, the researcher calculated the mean of the pre-test score as follows :

$$M_x = \frac{\sum x}{N}$$

$$M_x = \frac{1660}{31}$$

$$= 53,54$$

Next, the percentage of students who have reached the KKM, the researcher used the formula as follows :

$$P = \frac{F}{N} \times 100\%$$

$$P = \frac{8}{31} \times 100\%$$

$$= 25,8 \%$$

Obeying Mother

One day there was a mother cooking in the kitchen. Then she called her son who was watching TV in the living room. "Budi buy me a packet of salt in Mrs. Inah's shop!" Her mother begged. "Take this money but remember that the shop is across the street. You have to be careful. Do not cross the street before the car passes first, "her mother warned."Alright mom" replied Budi.

Budi immediately went to the shop. After waiting for a long time, his mother was worried because Budi did not come after nearly a half an hour. Soon afterward, she left her house to see Budi. She was worried that Budi was in danger.

After arriving near the shop, she was surprised to see the Budi stood motionless on the roadside. "Why are you so long?" asked her mother.

"I cannot cross this street mom" she was wonder and asked "why does it so? The street was very quiet, right? ""That is right, I want to cross the street but there is no car which passing by" Budi replied. "How can be like that?" her mother getting surprised. "You told me that don't cross the street before the car pass first and now I am waiting for the car to pass first. Therefore I cannot cross this street "replied Budi. His mother could only be silent.

Artinya:

Mematuhi Perintah Ibu

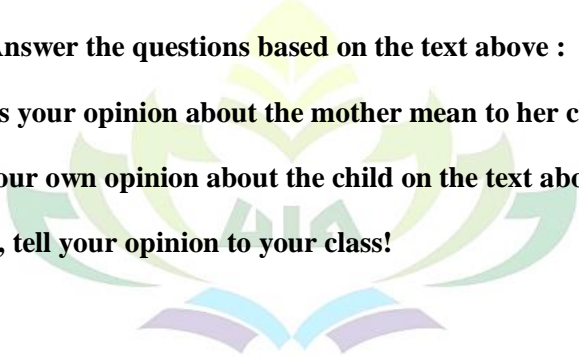

Pada suatu hari seorang ibu yang sedang memasak di dapur. dia memanggil anaknya yang sedang asyik menonton TV di ruang tamu. "Budi belikan ibu sebungkus garam di warung bu inah!" pinta ibunya. "ini uangnya, ingat warung bu inah ada di seberang jalan sana. kamu harus berhati-hati. jangan menyebrang sebelum mobil lewat" ibunya memperingatkan. "baik bu" jawab budi.

Budi pun segera pergi menuju warung bu inah. Setelah lama menunggu ibunya merasa khawatir karena Budi tak kunjung datang setelah hampir setengah jam menunggu. "Lama sekali anak itu jangan-jangan dia

tetabrak mobil” segera ibunya pergi menyusul si Budi karena khawatir anaknya dalam bahaya.

Setelah sampai di dekat warung bu inah, ibunya terkejut melihat budi berdiri terdiam di pinggir jalan raya. “budi kenapa kau lama sekali?” Tanya ibunya. “aku tidak bisa menyebrangi jalannan ini bu” jawab budi. Ibunya heran dan bertanya “kenapa tidak bisa? Jalanan itu sangat sepi kan?” “jalanan sangat sepi buk, aku ingin meyebrang tapi tidak ada mobil yang lewat” jawab budi. “kenapa begitu?” ibunya semakin heran. “loh bukannya ibu menyuruhku jangan menyebrang sebelum mobil lewat. Setelah aku tunggu-tunggu tidak ada mobil yang lewat. oleh karena itu aku tidak bisa menyebrang jalanan ini” jawab budi. Ibunya pun hanya bisa terdiam.

S1	<p>1. my point of view about Budi's mother mean is : If the road is full of vehicles passing by, then he have to wait a moment for the vehicles to pass, so Budi can cross safely.</p> <p>2. In my opinion, the child did not do what his mother ordered correctly because of the child's misunderstanding of the mother's words.</p>
S2	<p>1. I think the mother gives an unclear message to the child, she should use language that is to the point and easy to understand</p> <p>2. in my opinion, the son does not understand the true meaning of her mother's words.</p>
S3	<p>1. In my opinion, the mother is right to say that to her child so that her child will be safe when crossing.</p> <p>2. I don't think his son is wrong either, because he obeys what his mother says, but in a different sense.</p>
S4	<p>1. In my opinion, his mother meant to give a message that if you want to cross, you have to be careful.</p> <p>2. in my opinion, Budi misinterpreted his mother's words</p>

S5	<p>1. i think The mother meant that her child should be careful when crossing the road but the child misunderstood the words of his mother whose words were not quite right</p> <p>2. in my opinion, Budi carries out his mother's orders according to what his mother says, even though it is not according to what the mother means</p>
S6	<p>1. in my personal opinion, the child is very obedient to the words or orders of his mother</p> <p>2. in my opinion true, the child has obeyed according to his mother's orders</p>
S7	<p>1. In my opinion, in the eyes of Budi, it is important to obey his mother's requests and warnings</p> <p>2. In my opinion, Budi has carried out his mother's orders correctly, it's just that Budi has not been able to properly understand the meaning of his mother's warning</p>
S8	<p>1. I think what the mother means to her child is that the mother orders her child to buy a pack of salt at Mrs. Inah's shop, and the mother warns her child to be careful crossing the road because there are many cars passing by.</p> <p>2. In my opinion, he has carried out the order well, but the child has the wrong assumption and listens to his mother's words that don't cross the road before a car passes and the child doesn't want to pass or cross before a car passes.</p> <p>So the mother waited a long time and finally followed the child to Warung Bu Inah.</p>
S9	<p>1. From my point of view, the meaning of a mother who orders her child to be careful before crossing, but the command sentence from the mother is less effective so that her child thinks not to cross if no cars are passing.</p> <p>2. in my opinion, the child has carried out his</p>

	<p>mother's orders</p> <p>But wrong in interpreting orders from his mother</p>
S10	<p>1. In my opinion, what his mother means is don't cross before the car passes if there are lots of vehicles passing by on that road. So his son was told to be careful. Maybe the way of delivery is just not right so the child misunderstands.</p> <p>2. In my opinion, it's not wrong, because he carries out orders according to what his mother says and according to his son's understanding. But if the child understands what his mother means, he will cross the road because the road is quiet, he doesn't have to wait for a car to cross.</p>
S11	<p>1. In my opinion, the intention of the mother is to be more careful and pay attention to passing vehicles when she wants to cross a road.</p> <p>2. In my opinion, the child responds to his mother's warnings/orders in a different way. he thought that he had to wait for the car to pass before he could walk, but what his mother meant was to be careful when a vehicle passed. wait for the vehicle to pass first, then cross. even if there are no cars passing by, you can walk straight while looking right and left if there is a vehicle that will pass</p>
S12	<p>1. according to me, the mother intends to give a message to her child to be careful when crossing the street and in my opinion what her mother said is correct.</p> <p>2. In my opinion, the child misunderstood the mother's words and the child did not understand the mother's words hmm</p>
S13	<p>1. In my opinion, his mother said the truth, meaning his mother told him to be careful when crossing. cross after the car has passed.</p> <p>2. In my opinion, the child is also not wrong and the</p>

*student who passed the KKM

To get the result of the post-test 1, the researcher calculated the mean of the post-test score as follows :

$$M_x = \frac{\sum x}{N}$$

$$M_x = \frac{1936}{31}$$

$$= 62,45$$

Next, the percentage of students who have reached the KKM, the researcher used the formula as follows :

$$P = \frac{F}{N} \times 100\%$$

$$P = \frac{9}{31} \times 100\%$$

$$= 29 \%$$

The improvement score was derived by the formula:

$$P = \frac{y_1 - y}{y} \times 100\%$$

$$P = \frac{62,45 - 53,54}{53,54} \times 100\%$$

$$P = 16,64 \%$$

***student who passed the KKM**

To get the result of the post-test 3, the researcher calculated the mean of the final post-test score as follows :

$$Mx = \frac{\sum x}{N}$$

$$Mx = \frac{2376}{31}$$

$$= 76,64$$

Next, the percentage of students who have reached the KKM, the researcher used the formula as follows :

$$P = \frac{F}{N} \times 100\%$$

$$P = \frac{25}{31} \times 100\%$$

$$= 80,64 \%$$

The improvement score was derived by the formula:

$$P = \frac{y_3 - y_2}{y_2} \times 100\%$$

$$P = \frac{76,64 - 73,16}{73,16} \times 100\%$$

$$P = 4,75 \%$$

VALIDITAS & RELIABILITAS

(SPSS)

PRE-TEST :

1. Uji Validitas

Hasil analisis uji validitas pada instrumen soal *pre-test* dapat dilihat sebagai berikut ini:

Tabel. 9

3.	0,821	0,456	Valid
4.	0,894	0,456	Valid
5.	0,855	0,456	Valid

Berdasarkan tabel di atas bahwasannya hasil perhitungan validitas terhadap 5 butir soal *pre-test* yang di ujikan kepada sampel, menunjukkan bahwa ke-5 butir soal tersebut tergolong valid karena $r_{xy} \geq r_{tabel}$, sehingga dapat diujikan untuk mengukur kemampuan siswa.

Telah ditetapkan bahwa butir soal dikatakan valid jika memiliki $r_{xy} \geq r_{tabel}$, dengan nilai $r_{tabel} = 0,456$, menggunakan *Correlation is significant at the 0,01 (1%) level (2-tailed)*.

2. Uji Reliabilitas

Perhitungan uji reliabilitas pada 5 *pre-test* digunakan untuk melihat apakah butir soal tersebut dikatakan layak atau tidak digunakan. Uji reliabilitas ini menggunakan rumus *Alpha Cornbach*. Berdasarkan perhitungan reliabilitas pada 5 butir soal tersebut diperoleh $r_{11} = 0,903$. Nilai r_{11} dibandingkan dengan nilai 0,456 sehingga butir-butir soal dikatakan reliabel dikarenakan nilai $r_{11} > 0,456$ dan butir soal tersebut dapat digunakan untuk mengukur kemampuan siswa karena keajegan atau konsisten yang layak pada soal.

Hasil uji reliabilitas dapat dilihat pada lampiran berikut yang diperoleh nilai *Cornbach's Alpha* sebesar 0,903, maka dapat dilakukan bahwa instrumen tes tersebut reliabel karena nilai yang diperoleh lebih besar dari 0,456 sehingga sekarang soal tes tersebut layak untuk digunakan dalam pengambilan data penelitian.

Uji reliabilitas ini menggunakan rumus *Alpha Cornbach*. Berdasarkan perhitungan reliabilitas pada 5 butir soal tersebut diperoleh $r_{11} = 0,608$. Nilai r_{11} dibandingkan dengan nilai 0,456 sehingga butir-butir soal dikatakan reliabel dikarenakan nilai $r_{11} > 0,456$ dan butir soal tersebut dapat digunakan untuk mengukur kemampuan siswa karena keajegan atau konsisten yang layak pada soal.

Hasil uji reliabilitas dapat dilihat pada lampiran berikut yang diperoleh nilai *Cornbach's Alpha* sebesar 0,608, maka dapat dilakukan bahwa instrumen tes tersebut reliabel karena nilai yang diperoleh lebih besar dari 0,456 sehingga sekarang soal tes tersebut layak untuk digunakan dalam pengambilan data penelitian.

POST-TEST 3 :

1. Uji Validitas

Hasil analisis uji validitas pada instrumen soal **post-test 3 (cycle 3)** dapat dilihat sebagai berikut ini:

Tabel. 18
Validitas item soal post-test 3(cycle 3)

NO.	r_{xy}	r_{tabel}	Kesimpulan
1.	0,628	0,456	Valid
2.	0,541	0,456	Valid
3.	0,727	0,456	Valid
4.	0,727	0,456	Valid
5.	0,727	0,456	Valid

Berdasarkan tabel di atas bahwasannya hasil perhitungan validitas terhadap 5 butir soal *post-test 3 (cycle 3)* yang di ujikan kepada sampel, menunjukkan bahwa ke-5 butir soal tersebut tergolong valid karena $r_{xy} \geq r_{tabel}$, sehingga dapat diujikan untuk mengukur kemampuan siswa.

*. Correlation is significant at the 0.05 level (2-tailed).

** Correlation is significant at the 0.01 level (2-tailed).

Telah ditetapkan bahwa butir soal dikatakan valid jika memiliki $r_{xy} \geq r_{tabel}$, dengan nilai $r_{tabel} = 0,456$, menggunakan *Correlation is significant at the 0,01 (1%) level (2-tailed)*.

2. Uji Reliabilitas

Perhitungan uji reliabilitas pada 5 *post-test 3 (cycle 3)* digunakan untuk melihat apakah butir soal tersebut dikatakan layak atau tidak digunakan. Uji reliabilitas ini menggunakan rumus *Alpha Cornbach*. Berdasarkan perhitungan reliabilitas pada 5 butir soal tersebut diperoleh $r_{II} = 0,634$. Nilai r_{II} dibandingkan dengan nilai 0,456 sehingga butir-butir soal dikatakan reliabel dikarenakan nilai $r_{II} > 0,456$ dan butir soal tersebut dapat digunakan untuk mengukur kemampuan siswa karena keajegan atau konsisten yang layak pada soal.

Hasil uji reliabilitas dapat dilihat pada lampiran berikut yang diperoleh nilai *Cornbach's Alpha* sebesar 0,634, maka dapat dilakukan bahwa instrumen tes tersebut reliabel karena nilai yang diperoleh lebih besar dari 0,456 sehingga sekarang soal tes tersebut layak untuk digunakan dalam pengambilan data penelitian.
