ABSTRACT

By
FERANDA TIARA SANDITA

In teaching and learning process in the class, there are a lot of students who find some difficulties in learning English. One of the difficulties of students in English learning activity is speaking. The students’ speaking ability in MA Al-Hikamh Bandar Lampung is still low. To solve this problem, the researcher applied Make a Match technique. The objective of this research is to know whether there is a significant influence of using Make a Match Technique towards students’ speaking ability at the first semester of the tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

The research methodology used quasi experimental design. The researcher dealt with two classes, they were an experimental class and a control class. In the experimental class, the researcher used make a match technique, whereas in the control class the researcher used dialogue memorization technique. Each class received the same pre-test and post-test. The population of this research was the tenth grade of MA Al-Hikmah Bandar Lampung. The samples of this research were 2 classes consisting of 62 students. There are 30 students in experimental class and 32 students in control class. In collecting the data, the researcher used oral test to collect the data.

The researcher analyzed the data by using independent sample t-test, the results was that there was an influence of using make a match technique towards students’ speaking ability at the first semester of the tenth grade of MA AL-Hikmah Bandar Lampung in the academic year of 2018/2019. From the data analysis computed by using SPSS, it was obtained that $\text{Sig} = 0.015$ and $\alpha = 0.05$. It means $H_a$ is accepted because $\text{Sig} < \alpha = 0.05$. Therefore, there was significant influence of using make a match technique towards students’ speaking ability at the first semester of the tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

Keywords: make a match technique, speaking ability, quasi experimental design

DEDICATION

From the depth of my heart, this thesis is dedicated to everyone who cares and loves me. I would like to dedicate this thesis to:

1. My beloved parents, my father Mr. Mirhan Sandika and my mother Mrs. Ida Sari who always inspire, support and give me motivation to study hard until now. Therefore, thank you for giving the financial, moral and spiritual support.

2. My big families, Suwardi’s Family, Febriadi’s Family, Sarwo Edi’s Family, Novry’s Family, Dedy’s Family and Dedi A. Setiawan’s Family who always support me.

3. My beloved brother and his wife (Ferizal Jaya Sandika and Asmi), my younger brothers Firal Afin Ramadhan and Filal Reyhan Kadafi, my sister Ferinda Aura Sandita who always give me spirit and suggestion for my success.

4. Students of English Education class E as my partners since 2014.

5. My almamater UIN Raden Intan Lampung.
CURRICULUM VITAE

Feranda Tiara Sandita, she was born on April 28th 1997 in Way Jepara, East Lampung. She lives in S.Bandung Way Jepara East Lampung. She is the second child of Mr. Mirhan Sandika and Mrs. Ida Sari. She has three brothers and one sister. Her old brother’s name is Ferizal Jaya Sandika, the second brother’s name is Firal Afin Kadafi and the third brother’s name is Filal Reyhan Kadafi and her sister is Ferinda Aura Sandita.

The researcher began her study at SDN Sumur Bandung, in (2002-2008). After that she continued her study to SMP N 1 Way Jepara Lampung Timur in (2008-2011). Then, she continued her study to SMA TeladanWay Jepara in (20011-2014). After that she continued her study at Raden Intan State Islamic University of Lampung as student of English Study Program of Tarbiyah and Teacher Training Faculty. During study in UIN Raden Intan Lampung, she joined some organizations. It organizations was ESA (English Students Association), she was also active in UKM Bahasa, MPM (Student Consultative Assembly) of Tarbiyah and Teacher Training Faculty and the last active in PMII (Indonesian Moslem Student Movement Organization).
ACKNOWLEDGMENT

First of all, praise is due to Allah, the most merciful, the most beneficent for His blessing and mercy given to the researcher during her study and in completing this graduating paper successfully. Then, peace and salutation always be with our prophet Muhammad SAW who has guided us from the darkness to the lightness.

This thesis entitled “The Influence of using Make a Match Technique toward Students’ Speaking Ability at the First Semester of the Tenth Grade of MA Al Hikmah Bandar Lampung in the Academic year of 2018/2019” is presented to English Study Program of UIN Raden Intan Lampung. The primary aim of writing this thesis is to fulfill a part of students’ task in partial fulfillment of the requirement to obtain S1-degree.

Then, the researcher would like to thank the following people for their ideas, time and guidance for this thesis:

1. Prof. Dr. Chairul Anwar, M.Pd the Dean of Tarbiyah and Teacher Training Faculty, UIN Raden Intan Lampung with his personnel, who has given an opportunity to study until the end of this thesis composition.

2. Meisuri, M.Pd, the chairperson of English Education Study Program at UIN Raden Intan Lampung.

3. Bambang Irfani, M.Pd, the first advisor for his guidance help and countless time given to the researcher to finish this final project.
4. M. Sayid Wijaya, M.Pd, the second advisor, who has spent countless hours correcting this final project for its betterment.

5. Drs. Abdul Aziz as the principal of MA Al-Hikmah Bandar Lampung and all the teachers and staff who have helped the researcher in collecting data.

6. Nofvi Yanti, M.Pd and all English teachers at MA Al-Hikmah Bandar Lampung who have given the guidance and spirit in conducting this research.

7. All lecturers of English Department of UIN Raden Intan Lampung, who have taught the researcher since the first year of her study.

8. Big families of Mr. Mirhan Sandika and Mrs. Ida Sari in east Lampung.

9. All friends of the English Department of UIN Raden Intan Lampung, especially beloved friends in A until G class. Then, all of best friends who always give suggestion and spirit in framework of writing this research.

Finally, none or nothing is perfect and neither in this thesis. Any correction comments and criticism for the betterment of this thesis are always open heartedly welcome.

Bandar Lampung, March 2019
The Researcher,

Feranda Tiara Sandita

CHAPTER I
INTRODUCTION

A. Background of the Problem

Language is a system for the expression of meaning. It means that human uses language to express their ideas, feeling, opinions and arguments.\(^1\) It was need to interact or to communicate with other people. According to Siahaan language is a set of rules used by human as a tool of communication.\(^2\) People need language to took for and give people beneficial information. People can express their ideas, emotions, and desires, and it is used as a medium to interact one another to fulfill their daily needs.

Harmer says that language is used widely for communication who does not share the same (or even first).\(^3\) It means that language is a tool of communication to express what we thought.

There are many languages in the world, one of them is English. English is an international language. It is used and learned by almost of countries in the world. To face the globalization era, people should learn and use this language.\(^4\) It means that English is very important in global area, because English takes up a very important position in our life.

---

\(^1\)Bambang Setiyadi, *Teaching English as a Foreign Language*, (Yogyakarta, Graha Ilmu Press, 2006), p.10

\(^4\)M.F. Patel and Praveen M.Jain, *English Language Teaching: Methods, Tool & Techniques*, (Jaipur: Sunrise Publisher & Distribution, 2008), p. 4
English has four skill. They are listening, speaking, reading, and writing. All of these skills should be mastered by students and teachers. These skills are always connected one to another.\textsuperscript{5} For example, speaking is related to listening. Speaking has a quite important role in the transferring of the information, which is direct way of giving information from the speaker to the listener. So, the students are able to communicate in English.

Speaking is arguments in your mind that you tried to express them openly.\textsuperscript{6} It means that speaking is the ability to express something such as the idea or feeling orally. It can be used to communicate what feeling we have, to give report, idea, advice, instruction, complaint and so on.

Further, Speaking is one of the most important skill in learning foreign language especially English. Speaking is the same as oral interaction which are conventional ways of speaking information, expressing our idea, and thought have our mind.\textsuperscript{7} It means that speaking is a productive skill that requires learners to produce words to express their ideas orally.

According to Bull, speaking is talking to somebody about something that use voice to say something.\textsuperscript{8} The definition clearly show that the primary goal of

\textsuperscript{5}Hendri Guntur Tarigan, \textit{Berbicara Sebagai Suatu Keterampilan Berbahasa}, (Revised Ed), (Bandung: Angkasa Press, 2008), p. 2
learning foreign language is to be able to speak, the teaching process should help students to achieve the goal to the best their speaking ability.

Harmer states that good speaking activities can and should be highly motivating. Many speaking tasks (role-playing, discussion, problem-solving so on) are intrinsically enjoyable in themselves.\(^9\) It means that teacher should be creative to make students feel enjoy and interested during the process. They need more instruction and commandment from the teacher. It is teachers’ challenge to be able to motivate the students in learning speaking.

Learning speaking is difficulty for some students, sometimes they find some problems and some of them are not interested in learning speaking. In other words, they are lack of motivation from themselves. It was also found at MA Al-Hikmah Bandar Lampung.

Based on preliminary research in MA Al-Hikmah Bandar Lampung at tenth grade, the researcher found that the students have difficulty in speaking ability. Mrs. Nofvi as the English teacher in interview said that students’ speaking ability was still low, they were lack of vocabulary, shy and unconfidently in sharing their ideas. The researcher found the another problem that was student had little practice in speaking and they had low motivaton.\(^{10}\) The score of students’ speaking ability at tenth grade of MA Al-Hikmah Bandar Lampung see can in

---

\(^{10}\)Nofvi, *An Interview With the Teacher of MA Al-Hikmah Bandar Lampung*, August 22\(^{th}\) 2018), Unpublished
Table 1. The score also is still under criteria to evaluate and assess the students’ speaking score used in that school is 75.

Then, from interview of the students it was revealed that the teacher rarely used various techniques in the learning process. From the interview, the students said that they felt not confident, shy, and nervous to communicate and speak English in daily conversation, they were afraid to make a mistake, they were lack of vocabulary and also they felt bored and lazy to follow the lesson because the teacher did not use an interesting technique in teaching process.\textsuperscript{11}

Source: The Data from English Teacher of MA Al-Hikmah Bandar Lampung.

Based on Table 1, it can be known that achievement from the students in MA Al-Hikmah Bandar Lampung is still not yet optimal. It is only 44.3% of the students can achieve, while 55.7% of them have not completed yet based on the Criteria of Minimum Mastery (KKM) used in that school is 75. The data show that 54 students out of 97 students still get low score. It means that some of students still had the difficulties in their speaking ability.

\textsuperscript{11}The Students of MA Al-Hikmah Bandar Lampung, on an Interview, August 22\textsuperscript{th} 2018), Unpublished
After doing preliminary research, the researcher has to solve this problem. The students should be interested in learning English by providing them with appropriate technique which are able to make the students feel enjoy, not bored and also to improve their score in learning English. In the teaching and learning process there are many kinds of great technique that can be applied the teacher, to improve the students’ speaking ability, one of which is Make a Match Technique.

Make a Match is one of the co-operative learning methods. In this technique, students are looking for partners and studying a concept or particular subject in another atmosphere of fun. This technique can apply for all subject and in level class. It means that make a match is the technique who makes the students can find their partners, while they can be learning concept or topic, in the enjoyable situation.

Firdausia says that make a match technique trains students to have an attitude, good social and training students’ ability to communicate or speak, work together besides practicing students’ thinking speed. It means that this technique is not only useful to communicate, but also useful to make student’ confident to speak in the class with other friends and to increase the students’ learning motivation and interest thinking speed. By uses this technique, it will make the students improve their speaking ability easier.

---

According to the previous research, this technique is a good technique because it makes students more interested and enthusiastic in learning English in the class. It was supported by the previous research that was done by Zawil. This research has showed the significant different mean scores between pre-test and post-test of the experimental group (EG). The result of the t-test conclude that the students taught using Make a Match technique got better scores in vocabulary in context of a narrative text.\(^\text{14}\)

According to another previous research that was done by Kurnia, based on her undergraduate thesis, she had applied Make a Match technique in teaching speaking, she states that make a match technique is one of the technique that can be used by teachers in the form of a game English especially speaking because this technique can increasing students’ interest in learning speaking skills. As a result, teaching speaking by make a match technique can improve students’ speaking ability.\(^\text{15}\)

Another research conducted by Wastawan.\(^\text{16}\) This research shows that there is a significant difference of the scores between pre-test and post-test after being taught through make a match technique. It means there was significant increasing of the students’ reading comprehension.

\(^\text{14}\) Ratna Zawil, *Using Make a Match to Teach Vocabulary at Junior High School Banda Aceh*, *English Education (EEJ)*, 7(3), 311-328, July 2016

\(^\text{16}\) Komang Wastawan, *Increasing Students’ Reading Comprehension Through Make a Match Type of Cooperative Learning at First Grade of SMA 2013/2014*, p.9
Based on the second and third previous research, the researcher can conclude that make a match type of cooperative learning is a good technique. The technique can use to teach vocabulary and can increase students’ speaking ability and can improve students’ reading comprehension.

There are differences between those previous research and present research. The previous research used Make a Match technique to taught vocabulary, the second previous research is teaching speaking by using Make a Match technique and the third previous research used Make a Match type to increase the student reading skill comprehension. While in the present research, the use Make a Match technique to know its influence toward students’ speaking ability. Then, there are differences level of education between those previous research and present research.

Based on the explanation, the researcher is interested in conducting an experimental research entitled “The Influence of Using Make a Match towards Students’ Speaking Ability at the First Semester of the Tenth Grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019.

B. Identification of the Problem

Based on the background of the problem and the result of preliminary research, the researcher identifies the problems as follows:

1. The students’ speaking in English is still low

2. The students felt not confident, shy and nervous to communicate and speak English in daily conversation.
3. The students were afraid to make a mistake and lazy to follow the lesson.

4. The students were lack vocabulary.

5. The students were bored to study English because the teacher did not use interesting technique.

6. The students had a little practice and they had low motivation and not active in learning speaking.

C. Limitation of the Problem

Based on the background of the problem and identification of the problem, The researcher focused on using Make a Match Technique towards Students’ Speaking Ability. The researcher limits the materials to describe people, tourism, and historical place. This is accordance with the syllabus and taught at the First Semester of the Tenth Grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019.

D. Formulation of the Problem

Based on the limitation of the problem, the researcher formulated the problem as follows: is there any significant influence of using Make a Match technique towards Students’ Speaking Ability at the First Semester of the Tenth Grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019?

E. Objective of the Research

Objective of the research is to know whether there is a significant influence of using Make a Match technique towards Students’ Speaking Ability at the First
Semester of the Tenth Grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019.

F. Significance of the Study

This research is expected to have some advantages in the English teaching and learning process as presented below:

1. Theoretically
   a. To give information to the English teacher of MA Al-Hikmah Bandar Lampung about the influence of using Make a Match Technique towards Students’ Speaking Ability.
   b. To give motivation to the students of MA Al-Hikmah Bandar Lampung in studying English, especially in English speaking.

2. Practically
   a. For the English teacher, the findings of this research are expected to provide information for an effective learning technique called the Make a Match to improve the students’ speaking ability.
   b. For the students, the findings of the research are expected to offer interesting and various learning experience. So, they will participate in the speaking class more actively.
   c. For the schools, it is expect that Make a Match technique can become an interesting technique and stimulate the students. It can motivate other teachers to make new ways in teaching learning process.
F. Scope of the Research

The scopes of researcher are as follows:

1. Subject of the Research
   Subject of the research was the students at the First Semester of the tenth grade of MA Al-Hikmah Bandar Lampung.

2. Object of the Research
   Object of the research was the Influence of Using Make a Match Technique Towards Students’ Speaking Ability.

3. Place of the Research
   The research was conducted in MA Al-Hikmah Bandar Lampung.

4. Time of the Research
   The research was conducted at the First Semester in the academic year 2018/2019.
CHAPTER II
THEORETICAL FRAMEWORK

A. Concept of Speaking

Speaking is the direct route from one mind to another, and is the way usually choose when we want to ask a question or give an explanation.¹ It means that speaking is the way to communicate to others. Speaking is to share ideas feeling or new information with others.

According to Harmer, speaking as a form of communication, so a speaker must convey what he/she is saying effectively.² Moreover speaking is productive ability in which speaker produces and uses the language to express their sequence and at the same time he tries to get ideas or the message. In this situation, there is a process of giving or transpiring, encoding and understanding the message.

Thornbury states that speaking is an act of producing words. Speaking is so much part of daily life that we take it for granted.³ The average person produce tens of thousand of words a day, although someone may produce even more than that. It means that speaking is one effective way to interact and communicate with people in social life.

Meanwhile, Scott in Johnson and Morrow definite speaking as an activity involving two (or more) people. In which the participants are both hearers and speakers having to react to what they hear and make the contribution at high

¹Turk Christopher, Effective Speaking Communicating In Speech, (Prancis: Spon Press, 2003), p.9
speed. It means that in the process of speaking there must be at least two people, one is the speaker and the other is listener. Based on ideas, speaking is very important in daily activities, because we can react to other person and situation, express our ideas, thought and feeling, through spoken language.

According to Brown, there are five basic types of speaking as follows:

a) Imitative

The ability to simply parrot back to a word, phrase or possibility a sentence.

b) Intensive

The productions of stretches of oral language design to demonstrate competence in a narrow band of grammatical, phrasal, lexical, or phonological relationship.

c) Responsive

Interactions and test comprehension but at the somewhat limited level very short conversation standard greetings and small talk, simple request and comments and the like.

d) Interactive

The length and complexity of the interaction, which sometimes include multiple exchange and or/ multiple participants.

e) Extensive

---

4 Keith Johnson & Marrow, Communication In The Classroom, (New York: Longman, 2000), p. 70
The oral production task includes speeches, oral presentation and storytelling, during which the opportunity for oral interaction from listener is either highly limited.\(^5\)

Based on the types of speaking by Brown, imitative means mimics the activity of a speech, usually mimic talks conducted by elementary school students who do not know much about speaking in English. Intensive is a type of speaking that one step above imitative because imitative is speaking independently by forming their own sentences. Responsive is an activity when someone speaks and the other person can understand what she or he talking, and give an answer to what is being said. Interactive is speaking activities to interact with other people and environment by sharing information. Extensive is broadly speaking activities directly, for example, giving speech, presentation and storytelling. This research, the researcher will use responsive and interactive types of speaking.

From those definitions, it is clear that the students should be careful in choosing words and style in communication, somebody who wants to speak English well, she/he has to know the ways of speaking English. Speaking as activities by which human beings try to express feeling, opinion and to exchange information by using utterances in the form of communication. Therefore, as a tool of communication, it is necessary for people to have a good speaking ability.

1. Elements of Speaking

Speaking is the product of creative construction of linguistic string, the speaker makes choices of lexicon, structure, and discourse. The ability to speak fluently depends on how the speaker produces utterance to convey their meaning.

Harmer states that the ability to speak fluently presupposes not only a knowledge of language feature, but also the ability to process information and language. In order to do so, there are some elements that should be considered by the speaker. Those elements for spoken production are described by Harmer as follows:

a) Language Feature

Among the elements necessary for spoken production are the following:

1) Connected speech: effective speakers of English need to able not only to produce the individual phonemes of English. In connected speech, sound are modified (assimilation), omitted (elision), added (linking), or weakened (through construction and stress patterning). In this for he reason that we should involve students in activities designed specifically to improve their connected speech.

2) Expressive devices: native speakers of English change the pitch and stress on particular parts of utterance, very volume and speed, and show by other physical and nonverbal (paralinguistic) means how they are feeling (especially in face to face interaction).

3) Lexis and grammar: spontaneous speech is marked the use of a number of common lexical phrases, especially in the performance of certain language functions.

---

4) Negotiation language: effective speaking benefits from the negotiator language we use to seek clarification and show the structure of what are saying.

b) Mental/ Social Processing

1) Language processing: effective speakers need to be able to process language in their own heads and put it into coherent order so that it comes out in forms that are not only comprehensible but also convey the meanings that are intended. Language processing involves retrieval of words and phrases from memory and their assembly into syntactically and proportionally appropriate sequences. One of the main reasons for including speaking activities in language lessons is to help students develop habits of rapid language processing in language.

2) Interacting with others: most speaking involves interaction with one or more participants. This means that effective speaking also involves a good deal of listening, an understanding of how the other participants are feeling. And a knowledge of how linguistically to take turns or allow others to do.

3) (On the spot) information processing: quite apart from our response another feeling, we also need to be able to process the information they tell us the moment we get it. The longer it takes for the penny to drop the less effective we are as instant communicators. However, it should be remembered that this instant response is very culture-specific, and is not prized by speakers in many other language communities.\(^7\)

\(^7\)Ibid, p. 269
Based on the elements by Harmer, there are two: language feature and mental/social processing. These elements are for completing when they are speaking. These processing skills are also necessary elements in expressing the language because the environment will improve our fluency in speaking skill. If these elements have been mastered, the learners will have perfect speaking skill. So, the researcher will use all elements to teach speaking skill.

2. Speaking Ability

Speaking is process between speaker and listener and it involves the productive skill understanding.\(^8\) It means that to be good in speaking, the students must have the mastery of pronunciation, fluency, grammar, vocabulary and comprehension. Speaking is one of four basic skills of language and it has important role in daily because it is the main skill in communication.

Linse states that when the children begin speaking, they experiment and play with the utterance that is made to form words and phrases. As they grow, children integrate these words and structures into their real and imaginary play.\(^9\) It means that the speaking ability can develop their growth as well. The students in senior high school should be able to improve their words for speaking than the students in senior high school have more time to study about speaking.

Furthermore, speaking ability is also one language that will be learned and developed when studying a foreign language. Speaking ability is not only based

on the time where the students will study about speaking for a long time but also it is based on their habitual to speak English.\textsuperscript{10} It means that speaking is one of four skills of language and it has an important role in daily life because it is the main skill in communication.

Welty states that speaking must fulfill these criteria, there are pronunciation, fluency, grammar, vocabulary, and comprehension.\textsuperscript{11} It means that speaking can measured by its five criteria, so that can result good communication.

In conclusion, the researcher concluded that the student speaking ability is their ability to express their ideas, opinions, feelings, and experiences, using English with good pronunciation, grammar, vocabulary, Fluency and comprehension.

3. Teaching Speaking

Teaching speaking is one of the ways that can be used in other the learners can understand the meaning of communication in real communication. Brown states that teaching is guiding and facilitating learning, enabling the learner to learn, setting the conditions for learning and showing or helping someone to learn how to do something.\textsuperscript{12} It means the teaching is process that should be done by the teacher based on the experience, knowledge and material preparation the aim of teaching can be reached. It is because the ability to speak is the most basic of human to communication.

Kayi states that teaching speaking is an important part of First language learning. The ability to communicate in a First language clearly and efficiently contributes to the success of the learner in school and success later in every phase of life.\(^\text{13}\) It means that we can say success if we can be good communication. The ability of the good communicate can help us and gives good contribution in success future in our life.

According to Nunan, teaching speaking is to teach English learners to:

1. Produce the English speech sound and sound patterns.
2. Use words and sentences stress, intonation pattern and the rhythm of the First language.
3. Select appropriate words and sentences according to the proper social setting, audience, situational subject matter.
4. Organize their thoughts in a meaningful and logical sequence.
5. Use language as a mean of expressing values and judgments.
6. Use the language quickly and confidently with few unneutrall pauses, which is called fluency.\(^\text{14}\) It means that to make a good speaking, the learners have to use a several way, like there are six on the steps. From the learner can produce the English speech sound until using the fluency language.

The statement show that teaching speaking needs great effort as speaking English explores the learners’ skill. The skills cover grammar, pronunciation, choice of

words and organizing their thought will use the language. In addition, teaching speaking needs strategies to motivate students to speak.

**B. Concept of Make a Match Technique**

Make a Match is a technique that used in experimental class. In this subchapter, it be provided the topic that explain about: definition of Make a Match, procedure of using Make a Match, advantages and disadvantages of using Make a Match technique.

**1. Definition of Make a Match Technique**

Make a Match is one of the teaching techniques which can be used in co-operative learning.  

It means that make a match is one of cooperative learning that is played in pairs. The students are put in 2 groups, A and B, each of the students of the group get one card. Group A brings the questions (topic) cards; while B group brings the answers cards. When they are ready to start, the teacher asks them to face each other cards. After that, she rings the whistle as a sign that they have to find their matches as soon as possible. When they already found their matches, they can report it to the teacher. The teachers can motivate and encourage their students to be more interested and enthusiastic in learning English.

Supriyono states that by using the Make a Match technique, the students will get more attracted and pay more attention to their teacher. They will not feel so bored nor be afraid of making a mistake in pronouncing a word. Moreover, the teacher can minimize the difficulties they have in leading their students to learn once the

---

Ratna Zawil. *Using Make a Match to Teach Vocabulary at Junior High School Banda Aceh*, English Education (EEJ), 7(3), 311-328, July 2016, p. 6
The technique is applied.\textsuperscript{16} It means that using this technique, the teacher and students can work together, the students can enjoy, have fun and make it easier to practice or pronouncing an English word without any students feel bored or afraid.

Further, the things that we need to be prepared in teaching with make a match is cards. The cards consist of the questions and the other cards contain answer from the questions.\textsuperscript{17} It means that this technique is applying the cards with the main idea as a questions and supporting idea as an answer.

According to Lie, in the point of step make a match technique, the students looking for the partners who have the cards that contains the same topic.\textsuperscript{18} It means that every student will get one question/answer card. The student can match their partner based the same topic on each their card.

The aims of the technique based on Huda are as follows:

1. Deepening of material
2. Excavation the material
3. Edutainment.\textsuperscript{19} It means that, this technique make the students more deepen, excavate the material, so as to produce more understanding in good speaking English.

\textsuperscript{17}Ratna Zawil, Using Make a Match to Teach Vocabulary at Junior High School Banda Aceh, English Education Journal (EEJ), 7(3), 311-328, July 2016
\textsuperscript{18}Tukijan Tanireja, et. all, \textit{Model-Model Pembelajaran Inovatif dan Kreatif} (Bandung: Alfabeta, 2014 5\textsuperscript{th} edition), p. 106
\textsuperscript{19}Anita Lie, \textit{Cooperative Learning} (Jakarta: Gramedia, 2014 7\textsuperscript{th} edition), p. 56
\textsuperscript{19}Miftahul Huda, \textit{Model-Model Pengajaran dan Pembelajaran} (Yogyakarta: Pustaka Pelajar, 2014 5\textsuperscript{th} edition), p. 251
Based on explanation, it can be concluded that make a match is technique for teaching speaking by allowing the students to interact each other. This technique uses the cards as a media for helping the student to find their partner in learning process. The card will contain the topic and sub-topics that can help the students in generating ideas and makes the process of speaking skill easier.

2. Procedure of Make a Match Technique

While we are teaching in the class, it is important to make the class fun and active, by using make a match technique of cooperative learning, we can make all of students in the class become more interactive and involving themselves into the class’s activities, Curran (1994), states that this technique can make the students’ interest increase and interfere to the interactive situation in the class.\(^{20}\) It is the reason why the teacher should use make a match type of cooperative learning to make the students easier in learning process.

Before the students are asked to speak, first the teacher may explain the goal and the objective of the instruction. The procedures are as follows:

1. The teacher prepares some cards that contain several topics that suitable for a review session.

2. Then, each student gets a card. The teacher gives a different card to the each of students randomly.

\(^{20}\) Komang Wastawan, *Increasing Students’ Reading Comprehension Through Make A Match Type of Cooperative Learning at First Grade Of SMA*, p.3
3. Each student is looking for couple who have a card that match with their card. And the Teacher gives time to find out their partners based on the card held.

4. The student can join with two or more than three student which has the same topic in the card. Then, they can discuss the lesson with their partners to know whether they have understood the lesson or not.

5. After the student find out their complete partner, the teacher will ask the student to speak or to tell the text based on the topic in their cards.²¹

The modify of make a match technique to teach speaking are as follows:

1. The teacher gives the motivation to the students. The teacher can ask the some questions, telling some jokes and humors. The Teacher an also give brainstorming, so the student will know what they are going to learn.

2. The teacher give explanation about make a match. After that, the teacher can start to teach by saying “can you tell me about something?”

3. Before the teacher teaches by this technique, the teacher teaches the students how to make a description text in dialogue.

4. Then, The teacher prepares some cards that contain several topics that suitable for a review session.

5. Then, each student gets a card. The teacher gives a different card to the each of students randomly.

²¹Loc. cit, p. 135
6. After the students get card. They are looking for couple who have a card that match with their card. And the Teacher gives time to find out their partners based on the card held.

7. The student can join with two or more than three student which has the some topic in the card. In this section, the students are ready to practice in English. They do many dialogues to find the same card.

8. Then, they can discuss the lesson with their partners to know whether they have understood the lesson or not.

9. After the student find out their complete partner, the teacher will ask the student to speak or to tell the text based on the topic in their cards.

Based on the steps of make a match technique, the researcher concluded that make a match is the technique that contains the game in order the student looking for partners. Make a match is applied to help the students in speaking skill, especially based on the topic and sub-topic.

3. The Advantages of Make a Match technique:

Advantages and disadvantages of Make a Match to Miftahul Huda are as follows:

   a) Improving the process of students learning, on cognitive scale or on physical scale;

   b) The technique is including the game, so the process is enjoyable;

   c) Improving the student’s ability with the new subject and student’s learning motivation;
d) This technique is effective as model to improve student’s ability to present their result from the learning process; and

e) This technique is effective to improve student’s discipline.

4. The Disadvantages of Make a Match technique:

a) If this technique is less preparations, many time will be expalled;

b) In the first time at the process of teaching learning, too much students fee!

   Unconfident because their couple is different gender (male and female);

c) If the teacher doesn’t guide students well, there will be many students don’t pay attention with the teacher instruction when they are finding their partners and when they start speaking with the student’s partners.

d) The teacher must be careful when the teacher gives a punishment to the students who have not find their partners, because the condition can make students shy; and

e) Using this technique continuously will make students bored to involve in the process of teaching and learning.\textsuperscript{22}

C. Concept of Dialogue Memorization Technique

Dialogue Memorization is a technique that used in control class. In this subchapter, it be provided the topic that explain about: definition of Dialogue Memorization, procedure of using Dialogue Memorization, advantages and disadvantages of using Dialogue Memorization technique.

\textsuperscript{22}\textit{Ibid}, p. 253
1. Definition of Dialogue Memorization Technique

There are many activities that can be done in teaching speaking. All activities are hoped to be able to help the students in improving their ability especially for speaking. According to Izzan, there two categories of communication’s activities:

1. Pre-communicative Activity

   It is an activity that can be called as really communicative yet. It is cause there has not element that is needed in order to create the communication be natural. It means that there is no information gap.

2. Communicative Activity

   In this activity, the teacher gives many opportunities for the students to speak English very much. Teacher is also suggested to choose the activity that is agreement for the class.

One of the pre-communicative activities is dialogue memorization technique. The students ask to memorize and practice the dialogue before the students are drilled about structure and vocabulary. It means that using dialogue memorization technique for teaching speaking can help the students to improve their fluency but it cannot improve the students’ competence in communication term, because the students just focus on dialogue.

According to Larsen-Freeman, dialogue memorization is dialogue or short conversations between two people are often used to begin a new lesson. Students

---

memorize the dialogue through mimicry. It means that the students will be drilled to pronounce the dialogue very well which it can be guided by the teacher, after that the students must be able to memorize the dialogue and practice the dialogue fluently.

In addition, Harris states, the activity of dialogue memorization is: learner looks at text on paper then away (often while repeating aloud or silently the chunk of information to be remembered), then back at paper again, then away, with little or no variation, in an attempt to gradually get the next to “stick” in memory. It means that the students will likely stare at the page with furrowed brow, hoping that the words or images will stick in their mind.

Based on the explanation, the researcher concluded that dialogue memorization is a kind in teaching speaking that drills the students to be able to speak English fluently by memorize the dialogue, but it is ineffective way to teach speaking because it involves no actual “thinking” or processing no creativity, no imagination, no analysis, no logic, no thinking about the material.

2. Procedure of Dialogue Memorization Technique

There is a dialogue memorization technique that is still used by the English teacher to teach the students in speaking activity. Here is the procedure of teaching speaking through dialogue memorization.

---

25Tomothy M. Harris, *Text and Dialogue Memorization in English Language Learning*, (Osaka: Sangyo University, 2008), p. 149
1. Firstly, the teacher explains about description material and introduce about the dialogue memorization technique.

2. Secondly, the students first hear a model dialogue (either read by the teacher or on tape) after that students take the role of one person in the dialogue and the teacher the other. The teacher pays attention to pronoun, intonation, and fluency. Correction of mistakes of pronunciation or grammar is direct and immediate.

3. Thirdly, switch roles and memorize the other person’s part. The dialogue is memorized gradually, by line.

4. Then, the dialog is read aloud in chorus, one half saying one speaker’s part and the half responding. The students do not consult their book through out this phrase.

5. Next, this acted out by the students. The students may make dialogue in pair and the students perform the dialogue for the rest of the class.

6. Follow-up activities may take place in the language laboratory, where further dialog and drill work is carried out. It may be the next performance and the teacher gives evaluation about students’ performance.26

Based on those procedures, dialogue memorization is a technique that consist only of conscious exposure to the material, mental concentration, and of course repetition, the very nature of which is often tedious. Individuals have varied success with this approach and some find memorizing a text extremely difficult.

---

3. Advantages of Dialogue Memorization

The advantages of dialogue memorization technique based on Jankowsky are as follows:

a. Utilizing the grammar and learned vocabulary in the dialogue memorization.

b. The students will be acting out lively way when students memorize dialogue and present them in front of the class.

c. The students will use fluency, natural, intonation, and correct pronunciation for a meaningful presentation.

d. The students can learn much by watching their classmate performance.27

Based on the statements, by using dialogue memorization the students will be drilled to pronounce the dialogues very well which can be guided by the teacher, after that the students must be able to memorize the dialogue and practice it fluently in front of the class.

4. Disadvantages of Dialogue Memorization

Disadvantages of dialogue memorization technique according to Nicholson:

The key of memorizing dialogue is “go one line at a time”. It is not helpful to just blaze through huge chunks of dialogue; doing job of memorization a little harder later on.28 When the students are doing the dialogue memorization, they should lower of the noisy voice and pay attention to performance in front of the class condusively and the classroom activities will run well. Therefore, the students

---

also should choose the simple dialogue in order to make them understand easily the content of the dialogue.

D. Frame of Thinking

Based on the preliminary research, it was found out that the students got difficulty when they learned speaking. Sometimes students find some problems, they felt bored and lazy to follow the lesson because the teacher did not use an interesting technique in teaching process. In other words, they are lack of motivation from themselves.

In realization to the teaching of speaking and referring to the frame of the theories mentioned before, the researcher assumed that technique especially make a match is an appropriate technique to improve the students’ speaking skill and it can be as an alternative technique in teaching and learning speaking.

By using make a match technique the students can enjoy, have fun and make it easier to practice or pronouncing an English word without students feel bored or afraid. Then, the students also many interact to find their match card. The students do exercise to speak English and discuss with their partner about the material. This technique can make the students more interested and develop their motivation in learning speaking.

Make a match is technique for teaching speaking by allowing the students to interact each other. This technique uses the cards as a media for helping the student to find their partner in learning process. The card will contain the topic
and sub-topics that can help the students in generating ideas and makes the process of speaking skill easier.

In this research, the researcher considered that make a match technique is one technique of speaking that can give a good impact to students. Make a match is appropriate for teaching, because this technique give the students opportunity to many practice in English learning and can improve the students speaking skill.

E. Hypotheses

Based on the theories and frame of thinking, the researcher proposed hypotheses are follows:

\( H_a \): There is significant influence of using Make a Match technique towards students’ speaking ability at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019.

\( H_b \): There is no significant influence of using Make a Match technique towards students’ speaking ability at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung in the Academic Year of 2018/2019.
CHAPTER III
RESEARCH METHODOLOGY

A. Research Design

In conducting this research, the researcher used experimental design because in order to know that the influence of using Make a Match technique towards students’ speaking ability. An experimental design is the general plan to carrying out a study with an active independent variable. It means that by using experimental design, the researcher knows that Make a Match technique as an active independent variable any influence towards Students’ Speaking ability or not.

In experimental design, the researcher used quasi experimental design. This design used because if the writer randomly assigns the students two classes, it would be disrupted classroom learning. It means that the researcher used quasi experimental research design and applied two classes of students that consist of one class as the control class in this research.

Further, Ary et.al states that, the variety of quasi experimental designs, which can be divided into two main categories, there are pre-test and post-test, post-test only. It means that the researcher applied pre-test and post-test group design approach to used quasi experimental design.

The research design is as follows:

\[
\begin{align*}
G1 \text{ (random)} &= \quad T1 \quad X \quad T2 \\
G2 \text{ (random)} &= \quad T1 \quad O \quad T2
\end{align*}
\]

Where:
- **G1**: Experimental class (which receives the treatment of Make a Match Technique)
- **G2**: Control class (which is taught by using Dialogue Memorization Technique)
- **T1**: Pre-Test (this is given to see the students’ speaking ability)
- **T2**: Post-Test (this is given after treatment to see the result after applying the treatment)
- **X**: Treatment by using Make a Match Technique
- **O**: No treatment.

In this research, the researcher selected two classes randomly, one class as a control class and the last one as an experimental class. Then, students were given the pretest to know the ability of the students. After that, the researcher applied a treatment in each class. Dialogue memorization in control class and make a match technique in experimental class. It is conducted in order to know the differences between the average scores of speaking received by the students of experimental class and control class. After treatment, the students were given apost-test to know whether any influence in students’ speaking ability and to measures the progress made by the students.

**B. Variable of the Research**

A variable is a characteristic or attribute of an individual or an organization study.

There two variables and this research namely: independent variable and

independent variable. An independent variable is variable selected by the researcher to determine their effect on the relationship with the dependent variable. Dependent variable is observed to determine what effect.\(^5\)

In this research, the researcher focussed on two variables:

1. Independent variable is using make a match technique (X)

2. Dependent variable is using students’ speaking ability (Y)

**C. Operational Definition of Variable**

Operational definition of variable is used to explain the variables which used in this research to avoid misconception of variables presented in this research. The operational definition of variable is as follows:

1. Independent variable (X)

Make a match is technique for teaching speaking by allowing the students to interact each other. This technique uses the cards as a media for helping the student to find their partner in learning process. The card will contain the topic and sub-topics that can help the students in generating ideas and makes the process of speaking skill easier.

2. Dependent variable (Y)

Speaking ability is their ability to express their ideas, thought and feelings in their real communication for certain purpose in spoken from by showing the mastery of such as components as grammar, vocabulary, fluency, pronunciation and

comprehension, it is indicated by their score in oral test given making and performing about describing people, tourism and historical place.

D. The Population, Sample and Sampling Technique

To know whether total of the students, take the sample from total of the students and game from the sample some criteria should be considered. It is population, sample and sampling technique of the research.

1. Population

According to Creswell, population is a group of individuals who have the same characteristic. The population of this research was taken from students at the Tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018. The Numbers of students are 97 distributed in 3 classes.

---

2. Sample

Sample is a sub-group of the target population that the researcher plans to study for generalizing about the target population. The researcher took two classes as the sample of the research, one class as a control class and one class as an experimental class. The researcher determined that X.MIA as the experimental class and X.IIK as the control class.

3. Sampling Technique

In this research, the researcher used cluster random sampling technique choosing the sample. The selection of groups or cluster of subject rather than individuals is known as cluster random sampling. The researcher name of each class that written in small piece of paper, and these pieces of paper roll and put into box after that box would be shaken, and then the researcher took two piece of rolled paper. The first paper is as an experimental class and the second is as a control class.

E. Data Collecting Technique

In collecting the data, the researcher used:

1. Pre-test

The researcher gave pre-test to the students before giving treatment in order to know the basic of students’ speaking ability before treatment.

2. Post-test

---

7Ibid, p. 142
Post-test is a measure on some attribute or characteristic that is assessed for participants in an experimental after treatment. It means that, post-test used to know the students’ speaking ability after the researcher taught by using make a match technique.

F. Research Instrument

The instrument is a tool for measuring, observing, or documenting data, it contains specific questions and response possibilities that you establish and develop in advance of the study. In this research, the researcher used an oral test to know and measure the student’s ability in speaking after taught using make a match. The oral test was used as an instrument test.

In this research, the instrument is an instruction of dialogue for experiment and control class. The dialogues were about describing people, tourism place, and historical place. The teacher provided 5 pictures in each topic for experimental and control class, could be seen at appendixes 6. After they have the picture, the teacher asked them to dodescribe in front of the class and the teacher recorded the students’ description.

G. Research Procedures

1. Determining the subject of the research

The subject of this research was the students at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung.

---

10Ibid, p. 14
2. Determining the sample

In taking the sample of the research, the researcher used random sampling. The researcher chosen two classes as the sample of the research; one class is as the experimental class and one class as a control class.

3. Determining the instrument of the research

The researcher determined the instrument that would be taught to students. The instrument used oral test. The students got the same instrument for both classes in several topics.

4. Selecting the material that would be given

The researcher determined the material that is taught to the students of Tenth grade o MA Al-Hikmah Bandar Lampung. The materials were about Descriptive text of people, tourism place and historical place.

5. Doing pre-test to get the data

It will be done for the students in the experimental class and control class in order to find out the students’ speaking before the treatment. The administering pre-test took 90 minutes for both the experimental and control class. Then student began to speak up.

6. Conducting the treatment

The researcher gave the material in three times in meetings for the experimental class. It required 90 minutes for each meeting. The researcher taught the students by using make a match technique. Meanwhile, in the control class, the teacher
taught the students by using dialogue memorization technique has been taught by the teacher there.

7. Doing the post-test to get the data

The researcher conducted the post-test after the treatment. By giving the post-test, the researcher knew that the students’ improvement of speaking ability or not. The test included an oral test.

8. Analyzing the result of post-test

The researcher analyzed the data to find out whether the technique that used is effective or not.

H. Scoring Procedure

In evaluating the students’ speaking ability, the researcher will use the oral English-rating sheet propose by Brown.\(^\text{11}\) This research used the oral rating sheet to evaluate the students’ speaking ability. Then, to get the score the researcher used inter-rater. This inter-rater counted the level based on two series of scores gotten by two raters, the first rater is the English teacher and the second rater is researcher. The researcher also recorded all performance of the students and the assignment is made separately, such as the researcher can assess recordings at home or at other times.

<tbody>
<tr>
<td>1. Can handle with confidence but not with facility most social situation, including introductions and casual conversation about current events, as well as work, family, and autobiographical information.</td>
<td></td>
</tr>
<tr>
<td>2. Can discuss particular interest of competence with reasonable ease. Rarely has to grope for words.</td>
<td></td>
</tr>
<tr>
<td>3. Able to use the language fluently on all levels normally pertinent to professional needs. Can participate in any conversation within the range of this experience with a high degree of fluency.</td>
<td></td>
</tr>
<tr>
<td>5. Has complete fluency in the language such that his speech is fully accepted by educated native speakers.</td>
<td></td>
</tr>
</tbody>
</table>

| 5. Pronunciation | Errors in pronunciation are frequent but can be understood by a native speaker used to dealing with foreigners attempting to speak his language. |
2. Accent is intelligible though often quite faulty.
3. Errors never interfere with understanding and rarely disturb the native speaker, accent may be obviously foreign.
4. Errors in pronunciation are quite rare.
5. Equivalent to and fully accepted by educated native speakers.

Criteria for score:
5 = Excellent
4 = Very good
3 = Good
2 = Average
1 = Poor

Maximal score = 100

Students’ score = \( \frac{\text{Obtained score}}{\text{Maximum score}} \times 100 \)

Based on this oral rating sheet, there are five aspects to be considered: pronunciation, Grammar, vocabulary, fluency and comprehension.

### I. Validity

The validity is the most important consideration in developing and evaluating measuring instrument.\(^{12}\) It means an instrument can call valid when it can measure what is want to be measured. To measure whether the validity of the test has good validity or not, the researcher used content and construct validity.

---

\(^{12}\)Donald Ary et.al, *Op.Cit*, p.225
a. Content Validity

Content validity is the extent to which the question on the instrument and the scores from the question are representative of all the possible question that could be asked about the content or skills.\(^\text{13}\) Content validity can be found by relating the material of the test with the syllabus for SMA/MA. It means that to get content validity of speaking ability test, the researcher tries to arrange the material based on the objective of teaching in the school based on the syllabus, in K1/KD (3.7, 4.8, 4.10) about descriptive text of people, tourism place, and historical place for tenth grade of MA Al-Hikmah Bandar Lampung.

b. Construct Validity

Construct validity is a determination of the significance, meaning, purpose, and use scores from an instrument.\(^\text{14}\) Construct validity refers to assumption, showing the measurement was used contained correct operational definition, which was based on theoretical concept. In other words, construct validity is focused on the kind of the test which is used to measure the ability. In this research, the researcher used scoring rubric for speaking test. The scoring covered by five aspects of speaking, they are: grammar, vocabulary, pronunciation, fluency and comprehension. It was done, after the researcher consulted the instrument to the English teacher, Mrs. Nofvi Yanti, M.Pd in MA Al Hikmah Bandar Lampung to make sure the instrument has been valid.

\(^{13}\)John W. Creswell. *Educational research, Planning, and conducting Quantitative and Qualitative research* (Boston: Pearson, 2012) p. 618

Based on consulted the instrument to the English teacher, Mrs. Nofvi Yanti, M.Pd in MA Al Hikmah Bandar Lampung, the researcher concluded that the instrument was valid. The instrument was related with the aspect criteria of measurement.

**K. Data Analysis**

After collecting the data, the researcher analyzed the data by using parametric statistic and independent sample t-test. There were assumptions which must be fulfilled, they were normality and homogeneity tests.

1. **Fulfillment of the Assumptions**

Before knowing the result of data analysis by using independent sample t-test, firstly there were two assumptions that must be done and known. They are the normality test and the homogeneity test.

a. **Normality Test**

The normally test is used to measure whether the data In the experimental class and control classes are normally distributed or not. In this case, the researcher used statistical computation by using SPSS (*Statistical Package for Social Science*) for normality test. The test of normality employed Saphiro-Wilk.

The hypothesis are:

\[ H_0: \text{The data have normal distribution.} \]
\[ H_a: \text{The data are not normal distribution} \]

While the criteria of acceptance or rejection of normality test is as follows:

---

$H_o : \text{is accepted if } \text{Sig (P value)} \geq \alpha = 0.05$

$H_a : \text{is accepted if } \text{Sig (P value)} < \alpha = 0.05$

b. Homogeneity Test

Homogeneity Test is used to know whether the data in experimental class and control are homogenous is not. In this research, the researcher used statistical computation by using SPSS (Statistical Package for Social Science) for homogeneity test. The test of homogeneity employ Levene’s test.

The hypothesis are:

$H_o : \text{The variances of the data is homogenous}$

$H_a : \text{The variances of the data is not homogenous}$

While the criteria of acceptance or rejection of homogeneity test is as follows:

$H_o \text{is accepted if } \text{Sig (P value)} \geq \alpha = 0.05$

$H_a \text{is accepted if } \text{Sig (P value)} < \alpha = 0.05$

2. Hypothetical Test

After the researcher knows that the data is normal and homogeneous, the data will be analyzed by using t-test in order to know the significance of the treatment effect. The researcher used independent t-test, it aims to compare the data (mean) from two different groups. In this case, the researcher used statistical computation by using SPSS (Statistical Package for Social Science) for hypothetical test.

The hypotheses are:
\[ H_a: \] There is significant influence of using make a match technique toward students’ speaking ability at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

\[ H_0: \] There is no significant influence of using make a match technique toward students’ speaking ability at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

While the criteria of acceptance or rejection of homogeneity test is as follows:

- \( H_a \) is accepted if Sig (P value) ≤ \( \alpha = 0.05 \)
- \( H_0 \) is accepted if Sig (P value) > \( \alpha = 0.05 \)
CHAPTER IV
RESULT AND DISCUSSION

A. Result of the Research

This research was aimed to know whether there is significant and effectiveness of using Make a Match technique toward students’ speaking ability at the first semester of the tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019. The total number of the sample was 62 students, two classes were chosen as a control class and experimental class.

The instrument of this research was speaking oral test. Pre-test was conducted previously on Tuesday, February 5th, 2019 at 08.30 A.M for class X. MIA 1 as the experimental class and the pre-test in control class was XI.K at 11.00 A.M. The pre-test was administrated in order to know the students’ speaking ability before getting treatment.

After doing the research, the researcher got the result of the pre-test and post-test. The test was conducted in two classes, the first was experimental class and the second was control class. The pre-test was held on February 5th, 2019 and post-test was held on February 20th and 23rd, 2019.

The result of pre-test and post-test are as follows:

1. Result of the Pre-Test

The pre-test was administered in order to know students’ speaking skill before the treatment given. It can be seen from the pre-test score students’ speaking ability in experimental and control class.
Based on figure I, it could be seen that there were 2 students who got 44 score, 1 student who got 46 score, 2 students who got 48 score, 1 student who got 50 score, 2 students who got 52 score, 3 students who got 54 score, 4 students who got 56 score, 3 students who got 58 score, 6 students who got 60 score, 1 student who got 62 score, 3 students who got 64 score, 1 student who got 66 score and 1 student who got 68 score. It can be seen that highest of pre-test in experimental class is 68 and the lowest score was 44.
### Table 7
Statistics
Pre-Experimental

<table>
<thead>
<tr>
<th></th>
<th>Valid</th>

</tr>
<tr>
<td>Minimum</td>
<td></td>
<td>56.00</td>
</tr>
<tr>
<td>Maximum</td>
<td></td>
<td>84.00</td>
</tr>
</tbody>
</table>

Then, based on table 10, it could be seen that, the mean of pre-test in control class is 72.81, standard deviation was 7.752, N was 32, median was 76.00, mode was 76.00, variance was 60.09, minimum score was 56 and maximum score was 84.

B. Result of Data Analysis

After collecting the data, the researcher analyzed the data by using independent sample t-test. There were two assumptions that must be done before the researcher analyzed the data by using independent sample t-test.
1. **Fulfillment of the Assumptions**

Before knowing the result of data analysis by using independent sample t-test, firstly there were two assumptions that must be done and known. They are the normality test and the homogeneity test.

**a. The Result of Normality Test**

The normally test is used to measure whether the data in the experimental class and control classes are normally distributed or not.\(^1\) In this case, the researcher used statistical computation by using SPSS (*Statistical Package for Social Science*) for normality test. The test of normality employed Saphiro-Wilk.

The hypotheses are:

\(H_0\) = Data have normal distribution

\(H_a\) = Data do not have normal distribution

The test criteria:

\(H_0\) is accepted if \(\text{Sig (PValue)} \geq \alpha = 0.05\)

\(H_a\) is accepted if \(\text{Sig (PValue)} \geq \alpha = 0.05\)

<table>
<thead>
<tr>
<th></th>
<th>Kolmogorov-Smirnov(^a)</th>
<th>Shapiro-Wilk</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Statistic</td>
<td>df</td>
</tr>
<tr>
<td>Exp</td>
<td>.087</td>
<td>30</td>
</tr>
<tr>
<td>Ctr</td>
<td>.096</td>
<td>30</td>
</tr>
</tbody>
</table>

\(\ast\) This is a lower bound of the true significance.
a. Lilliefors Significance Correction

Based on the table 4, it can be \( P_{\text{Value}}(\text{Sig}) \) for experimental class was 0.200 for Kolmogorov-Smirnov and 0.685 for Shapiro-Wilk. Because \( \text{Sig} (P_{\text{Value}}) \) of experimental class >\( \alpha \) 0.05 it means \( H_{0} \) is accepted if \( \text{Sig} (P_{\text{Value}}) \) for the control class >\( \alpha \) 0.05 it means \( H_{a} \) is accepted. The conclusion, the data had normal distribution.

b. Result of Homogeneity Test

Homogeneity Test is used to know whether the data in experimental class and control are homogenous is not. In this research, the researcher used statistical computation by using SPSS (Statistical Package for Social Science) for homogeneity test. The test of homogeneity employ Levene’s test.

The hypothesis are:

\( H_{0} \): The variances of the data is homogenous

\( H_{a} \): The variances of the data is not homogenous

While the criteria of acceptance or rejection of homogeneity test is as follows:

\( H_{0} \) is accepted if \( \text{Sig} (P_{\text{Value}}) \geq \alpha = 0.05 \)

\( H_{a} \) is accepted if \( \text{Sig} (P_{\text{Value}}) < \alpha = 0.05 \)

<table>
<thead>
<tr>
<th>Table 5 Homogeneity Tests of Variances</th>
</tr>
</thead>
<tbody>
<tr>
<td>Levene Statistic</td>
</tr>
<tr>
<td>------------------</td>
</tr>
<tr>
<td>2.337</td>
</tr>
</tbody>
</table>
Based on the result obtained in the test of homogeneity of variances in the column, it could be seen that $\text{Sig (P value)} = 0.074 > \alpha = 0.05$. It demonstrated that $H_0$ was accepted because $\text{Sig (P value)} > \alpha = 0.05$. It means that the variance of the data was homogenous.

c. Result of Hypothetical Test

After the researcher knows that the data is normal and homogeneous. The researcher used parametrical statistic, independent t-test. In this case, the researcher used statistical computation by using SPSS (Statistical Package for Social Science) for hypothetical test.

The hypotheses are:

$H_a$: There is significant influence of using make a match technique toward students’ speaking ability at the First Semester of the Tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

$H_0$: There is no significant influence of using make a match technique toward students’ speaking ability at the First Semester of the Tenth grade of MA Al Hikmah Bandar Lampung in the academic year of 2018/2019.

While the criteria of acceptance or rejection of homogeneity test is as follows:

$H_a$ is accepted if $\text{Sig (P value)} \leq \alpha = 0.05$

$H_0$ is accepted if $\text{Sig (P value)} > \alpha = 0.05$
Based on the result obtained in the independent sample t-test in Table 6, that the value of significant $\text{Sig (P}_{\text{value}}) = 0.015 < \alpha = 0.05$. So, $H_\alpha$ is accepted and $H_o$ is rejected. Based on the computation, it can be concluded that there was significant influence of using Make a Match towards students’ speaking ability at the first semester of the tenth grade of MA Al-Hikmah Bandar Lampung in the academic year of 2018/2019.

C. Discussion

At the beginning of the research, the pre-test was administered to know the students’ speaking ability before they were given treatment by the researcher. The result showed that the mean score of pre-test between experimental class was 56.40 and the mean score of pre-test in control class was 53.13.

Afterward the students were taught by using Make a Match in experimental class and Dialogue Memorization in control class. The material was three topic of describing people, tourism and historical place for three treatments. Before doing Make a Match, the researcher explained about what Make a Match and how we do the procedure of Make a Match in the beginning of treatment. The researcher asked the students about the descriptive text and explained it also given example by picture to the students.

<table>
<thead>
<tr>
<th>T</th>
<th>df</th>
<th>Sig. (2-tailed)</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.501</td>
<td>60</td>
<td>.015</td>
</tr>
</tbody>
</table>

Table 6

The Result of Hypothetical Test
At the end of the research, post-test was given to measure the improvement of the students speaking ability in both classes after the treatments done. The mean score of post-test in experimental class was 81.33 and mean of post-test in control class was 72.81. It means teaching speaking by Make a Match more effective, interesting and can increase their speaking score.

From the result, we can see that the result of students’ post-test is higher than pre-test. Besides that Make a Match can improve each aspect of students speaking ability including grammar, vocabulary, pronunciation, fluency and comprehension. The result of pre-test and post-test also showed that students who taught by Make a Match got better result than students who taught by Dialogue Memorization.

Firdaus says that make a match technique trains students to have an attitude, good social and training students’ ability to communicate or speak, work together beside practicing students’ thinking speed. It means that this technique is not only useful to communicate, but also useful to make students’ confident to speak in the class with other friends and to increase the students’ learning motivation and interest thinking speed. By using his technique, it made students improve their speaking ability easier.

Moreover, Miftahul Huda state that advantages of make a match are as follows: 1) improving the process of students learning, on cognitive scale or on physical scale; 2) the technique is including the game, so the process is enjoyable; 3) improving the students’ ability with the new subject and students’ learning
motivation; 4) this technique is effective as model to improve students’ ability to present their result from the learning process; and 5) this technique is effective to improve students’ discipline.

However, in doing research found some problems such as; the students were noisy when the students practice dialogue in front of the class. So, the researcher had to raise the voice in remaining the time. From the problem the researcher found some solutions, such as the researcher asked the students to minimize the volume of their voice in order to hear the researcher’ voice. So, they can do the task and more speak English in dialogue. The researcher kept remaining the students about the time.

By using make a match technique the students can enjoy, have fun and make it easier to practice or pronouncing an English word without students feel bored or afraid. Then, the students also may interact to find their match card. It can be seen from the procedure of make a match technique at the treatment. The students do exercise to speak English and discuss with their partner about the material (about describing people, tourism and historical place) this technique can make students more interested and develop their motivation in learning speaking.

Based on the analysis of the data and testing hypothesis, the result of independent sample t-test null hypothesis (H₀) is refused and alternative hypothesis (H₁) is accepted. It means that treatment had influence of using Make a Match toward students’ speaking ability at the first semester of the tenth grade of MA-Al Hikmah Bandar Lampung so, the alternative hypothesis is accepted. It had been
supported by the previous research that was done by Zawil, entitled “Using Make a Match Technique to teach vocabulary of Eight Grade Students at Junior High School (SMP) 18 Banda Aceh”. She said that Make a Match technique is a good technique because it makes students more interested and enthusiastic in learning English in the class.
CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

After analyzing the data, the researcher drew a conclusion as follows:

There is a significant influence of using Make a Match technique towards student's speaking ability. The result of data calculation in previous chapter where null hypotheses ($H_0$) was rejected and ($H_a$) was accepted, it means that Make a Match can give an influence towards students' speaking ability. The significant can be seen from Sig (2-tailed) of the equal variance assumed in the independent sample t-test table where the Sig (2-tailed) is 0.015. It is lower that $\alpha = 0.05$ and it means $H_0$its rejected and $H_a$ is accepted. It can be revealed from the hypothetical test, where alternative hypothesis is accepted and null hypothesis is rejected.

B. Suggestion

After conducting the experiment, analyzing the data and discussing the result, the researcher gives some suggestions to those who might be benefited to the result of this research, they are English teacher and next researcher.

1. Suggestion for English Teacher

After conducting the research and getting the result, the researcher would like to suggest the teacher in teaching speaking by using Make a Match technique.
They are as follows:

a. Make a Match can be one alternative technique to be implement to teach speaking, writing, listening and reading.

b. The teacher should give more chance to the students to be more active and let the students to do several practices such as giving opportunities to dare for speaking in pairs and let the students report the result of the question-answer card in material in front of the class.

c. The teacher should put the students in to a pairs so they can get more speaking practice. by putting the students in pairs they can be stimulated to speak. Consequently the students' speaking ability will improve.

d. The teacher must be carefully set the time allocation. If the time allocation is not appropriate, the time is too large. It is difficult to handle.

2. Suggestion for Students

After conducting the research and getting the result, the researcher would like to suggest the students in Learning English. They are as follows:

a. The students should pay attention about the time limit given by the teacher in doing the learning process, so they can use the time affectively.

b. The students should follow the ruler of the technique, do not be noisy and keep effective class so they can improve their confidence in speaking English.
c. The students should practice to speak English with their friends in front of the class and also at home, in order to develop their speaking ability.

3. Suggestion for the School
The school should provide other facilities for students to practice their English competency.

4. Suggestion for the Next Researcher
After conducting the research and getting the result, the researcher would like to suggest for the next researcher to develop English teaching and learning. They are as follows:

a. The researcher applied Make a Match technique to increase students' speaking ability. Therefore, it is suggested for the next researcher to use make a match in other skills such as reading skill or writing skill.

b. The treatments were done in three meetings. Other researchers can spend more time in giving the treatments so that the students can get more speaking practice.

c. The researcher used Make a Match to increase students' speaking ability in the tenth grade students. Other researcher can conduct this technique on different grade.

4. What are the difficulties you find in teaching English?
   
   There are some difficulties as follows:
   
   a. The students are lazy, such as: they do not want to bring dictionary when they have English subject.
   
   b. The students have low motivation to study.
   
   c. The students are usually lazy to be active in learning activity and they feel shy to speak English.

   It can be concluded that the students have low motivation to study English and do not active in learning activity.

5. How is the students’ ability in speaking?

   The students still difficult to practice in English and they feel difficult to expression in English even greeting and parting expression.

   It can be conclude that the students’ speaking ability is still low.

Lampiran 1
Materi pembelajaran

Example Picture of the Card:

Question- Answer

Andre Taulany was born in Jakarta, September 17, 1974. He is married to Rien Wartia Trigina. They have 3 children, Ardio, Arlova, and Akenzy. He is tall enough, 173 cm. He has white skin, pointed nose, black hair, and oval face.

Andre Taulany is a comedian. But before existing in comedy, he was a vocalist of Stinky. But for many reasons, he turned his life to be a comedian. He is also an actor. His first movie is Kiamat Sudah Dekat. His another job is a presenter. He has a talkshow with his partner Sule in one of a TV station in Indonesia

Language Feature od Descriptive Text:

- Using simple present tense.
- Using attribute verb, such as be (am, is, are)
- Only focus on one object
- The use of the adjective (an adjective) to clarify the noun.

Discuss the questions:

1. Who is he/she?
2. What is he/she like?
3. What colour is his/her hair?
4. What colour are his/her eyes?
5. What is his/her nose like?
Lampiran 2

Sub topic yang akan digunakan dalam make a match technique

“Descriptive of People”

Questions Cards:

1. Who is he/she?
2. What is he/she like?
3. What colour is his/her hair?
4. What colour are his/her eyes?
5. What is his/her nose like?

Answers Cards:

Joko Widodo          Ir. Soekarno
Selena Gomes         Justin Biber
2. Discuss in the pairs about the questions, the language feature and describe a story about him/her orally in front of the class!
Pink Beach or Pantai Merah Muda is one of the beaches in Komodo island, East Nusa Tenggara. The beach is called Pink Beach because the sand beach is pink. The pink color of its beach is a mixture of white sand beach colors mixed with crushed coral, shells, calcium carbonate from marine invertebrates that are very small, and also Foraminifera, microscopic amoeba that has a red body shell.

At Pink Beach, there are so many marine organisms. No fewer than 1,000 species of fish, 260 species of coral, and 70 species of sponge can be found here. Having so much marine life, this place is a proper spot for snorkeling and diving for sea sports lovers.
Language Feature of Descriptive Text:

- Using simple present tense.
  
  Example: Pink Beach or Pantai Merah Muda is one of the beaches in Komodo island, East Nusa Tenggara.

- Using attribute verb, such as be (am, is, are).

- Only focus on one object.
  
  Example: Pink Beach.

- The use of the adjective (an adjective) to clarify the noun. For example: Having so much marine life, this place is a proper spot for snorkeling and diving for sea sports lovers.

- Using noun that related to historical places.

Discuss the questions:

1. What is the name of that place?

2. Where is it?

3. What is the beauty of the place?

4. What does it look like?

5. How old is the place?
